About GSSS

- The about box presents general information on GSSS, including the software registration steps, as well as how to keep in touch with the developer as shown in Figure 10 on the right.
- **Note: First time subscriber MUST sign up the 1 year subscription plan. Upon the maturity of the tenure, he may go for the half year or 1 year renewal plan. Half year package costs slightly higher.**
 - **GSSS for Computer costs RM1,980 per annum.**
 - **Web-Based GSSS costs RM1,800 per annum.**
- **Please refer to FAQ for more explanation and how a special consideration applies under specific condition.**

Note: Apart from subscribing to GSSS, user may also choose to purchase individual stock analysis reports.

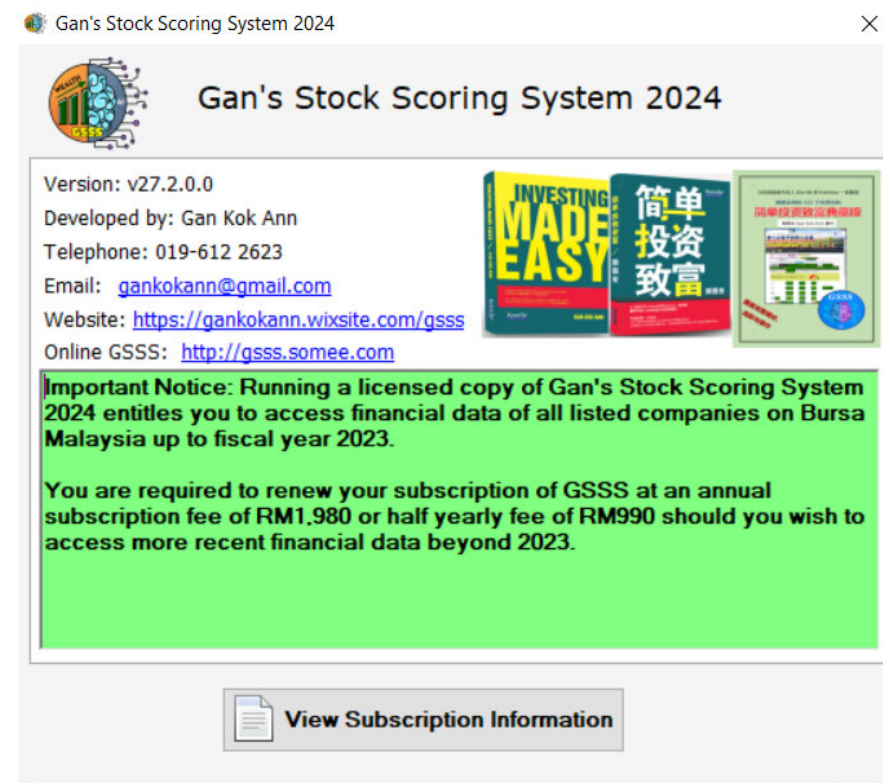

Figure 10 – General Information On GSSS

A Brief History On The Birth Of GSSS

- As we all know, our stock investment return will be lucrative if we can buy a five-star stock at a price far below its intrinsic value, i.e. the stock MUST be considered “good quality” and the price MUST be “cheap” (possess margin of safety) relative to its valuation.
- Over the years, I have been searching for a powerful Bursa Malaysia stock analysis/screening software that satisfies both the criteria outlined above but to no avail. Although there are a handful of software applications in the market, they all lack both features pursued by me. Eventually after I took an early retirement and had more free time, I decided to develop such systematic stock analysis application myself, primarily for my own use.
- Hence, after months of relentless design and coding efforts, thus emerged the brainchild of my hard-work: GSSS, which spans across the complete Computer, Mobile Device as well as Web platforms. Having these three variants, coupled with two investment books I authored, namely “简单投资致富” and “Investing Made Easy”, they all constitute towards the formation of a versatile ecosystem.
- The gist of GSSS is that it can be utilized to analyze all the Bursa Malaysia listed companies, assigns individual scores to them, and systematically identifies those that are of “good quality”. On top of that, GSSS is versatile to provide advice on whether the current price of a good quality is considered “cheap” to invest, after taking into account its intrinsic value.
- Successful and profitable stock investment relies on the combination of both selecting the right stock as well as buying at the right price. Thankfully, based on my own experience, GSSS undoubtedly achieves these two noble objectives as required.
- After painstaking efforts, I finally managed to access historical EOD (End Of Day) data for all stocks and import them into the database. I will upload the monthly accumulated daily transaction EOD data for registered users to download and automatically import into the database. With this, we gain a deeper understanding of the past stock price performance of each stock.

Disclaimer Note

- All the historical financial data gathered by GSSS originate from various web sites, and are kept internally within GSSS' database. The invaluable database serves as the foundation for GSSS to utilize them to perform advanced fundamental analysis as well as limited technical analysis.
- While GSSS strives hard to preserve the accuracy of various computations, there is no guarantee that the underlying financial data are 100% accurate and up-to-date.
- User is therefore strongly advised to rely on GSSS as a primary tool for filtering out less than satisfactory stocks, before engaging on subsequent in-depth qualitative analysis on the selected few good stocks that remain.
- **In a nutshell, any stocks that entitle for the “PASS” verdict by GSSS’s Data Analysis (First Phase) do not necessarily qualify for the “Buy” recommendation, as user is required to further inspect the various trend indicators covered in the Final Pass List (Second Phase) report like Overall Trend Score, Piotroski F-Score, Magic Formula, etc. to decide whether it is worthy of in-depth study.** The developer of GSSS is not liable for any monetary losses incurred by the user for blindly following the recommendations made by GSSS in stock trading.
- Nonetheless, successful and profitable stock investment relies on the combination of both selecting the right stock as well as buying at the right price. Thankfully, based on my own experience, GSSS undoubtedly achieves these two noble objectives as required.

Why Is GSSS So Important?

- Provision of intrinsic value estimations using 21 established models, thus greatly increasing the accuracy of the final estimated intrinsic value. Apart from that, its versatile machine learning with A. I. (Artificial Intelligence) capabilities further help subscribers to affirm if stocks are undervalued or overpriced. **Anyway, if a stock was involved in bonus, issue rights issue, stock split or share consolidation in the current financial year, its intrinsic value may deviate slightly from the actual value. Please take note of such discrepancy.**
- Compared with other similar software in the market, GSSS is the only one that offers comprehensive key fundamental analysis indicators, covering both the quantitative as well as qualitative analyses.**
- Upon closer scrutiny, some widely perceived as good counters are not so in reality.
- Grouping of stock counters by industry / sector so that it is easier to spot the market leaders.
- Built-in versatile fraud detection. Mark counters identified as potential investment trap in red (illustrated in Figure 2) such that user will not fall prey to them.
- User is able to spot the performance trend of any stock counter easily as past financial data are readily available in the local database storage.

Intrinsic Values (RM)	
Net Current Asset:	RM2.73

Figure 2 – Companies Run By Suspected Malicious Management Are Highlighted In Red As A Warning Sign

Differences Between Two GSSS Packages

Web-Based GSSS lacks two major features that are exclusive to GSSS for Computer subscribers:

- **Instantaneous update of financial data at as soon as the statements are available on Bursa Malaysia site. Computer package subscribers get to view the latest intrinsic value presented in the Final Pass List report, without any delay. In contract, Web package subscribers will have to endure delay, waiting for the Computer package subscribers to upload the analyzed results when performing the Data Analysis task.**
- **Provision of historical price charts rendered with A. I. capability for all stocks.**

GSSS For Computer

(Runs On Microsoft Windows 10 And Above)

Installer Download Site: <https://bit.ly/2VYIEa1>

Note: If you are NOT familiar with handling computer software, please do NOT choose the Computer package.

If subscriber does not know how to install GSSS for Computer, I can help install and register it on your behalf by remote access via TeamViewer.

Please download it from <https://www.teamviewer.com/en/download/windows/>.

Pre-requisites For Launching GSSS For Computer

- GSSS was developed using Microsoft C# programming language. It runs on Microsoft Windows operating systems such as Windows 10 and Windows 11, in both 32-bit and 64-bit environment.
- **Microsoft .NET Framework 4.8 and Google Chrome v95 or later are required for successfully running GSSS.**
- **In addition, because GSSS needs to visit many websites to obtain data and then perform complex and highly intelligent calculations, many anti-virus software applications mistakenly think that GSSS contains a virus, thus prevent it from operating. Users must therefore exempt GSSS from anti-virus software to keep it running. Please install GSSS in your Virtual Machine environment if you can't disable antivirus software on your host operating system.**
- Since the analysis results are stored in PDF format, a PDF viewer is required for viewing the report.
- Whenever a new version of GSSS is available, the upgrade steps from the old version to the new version are very simple: Visit <https://bit.ly/2VYIEa1> to download both the Full Release and Patch Release setup files.

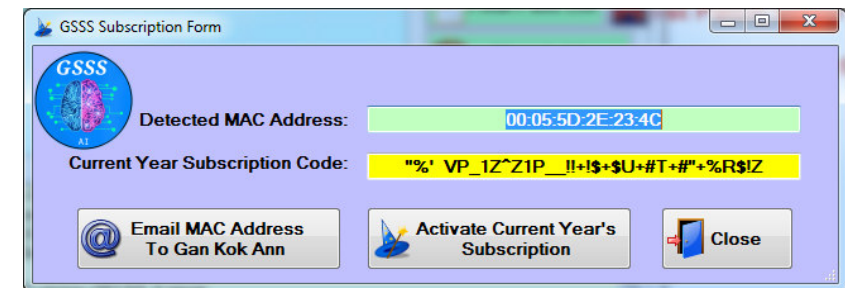

Note: For new GSSS user, please first install GSSS Full Release Setup v25.0.0.0, followed by any GSSS Patch Release Setup. GSSS automatically detects the presence of newer version. User no longer faces the risk of forgetting to upgrade to the newer release.

Initial Set Up And Getting GSSS To Work For The Very First Time

1. Install "GSSS Full Release Setup v25.0.0.0.exe".
2. Install GSSS Patch Release Setup, which is at least v27.2.
3. Register GSSS by selecting the "Subscribe GSSS" command from the "All Users" menu to send out your MAC Address. **You will receive the license key via email which may be wrongly recognized as spam, which is NOT in actual fact. Please copy both "Authentication" and "LicenseKey.txt" to C:\Gan's Stock Scoring System directory.**
4. **Launch GSSS. Now from within GSSS, you need to first click "Download Annual Reports From Cloud (Once A Month)". Only do it once per month.**
5. Now you are ready to rock N roll. Go to "C:\Gan's Stock Scoring System\StockList and open WatchList1.ini.
6. Copy the 4 line information of a stock like TGUAN to another stock category like Portfolio.ini. Save the new changes in Portfolio.ini.
7. Next, select Portfolio and then click on the "Data Analysis" button to start the analysis job. Once completed, the content of a PDF file will be displayed.

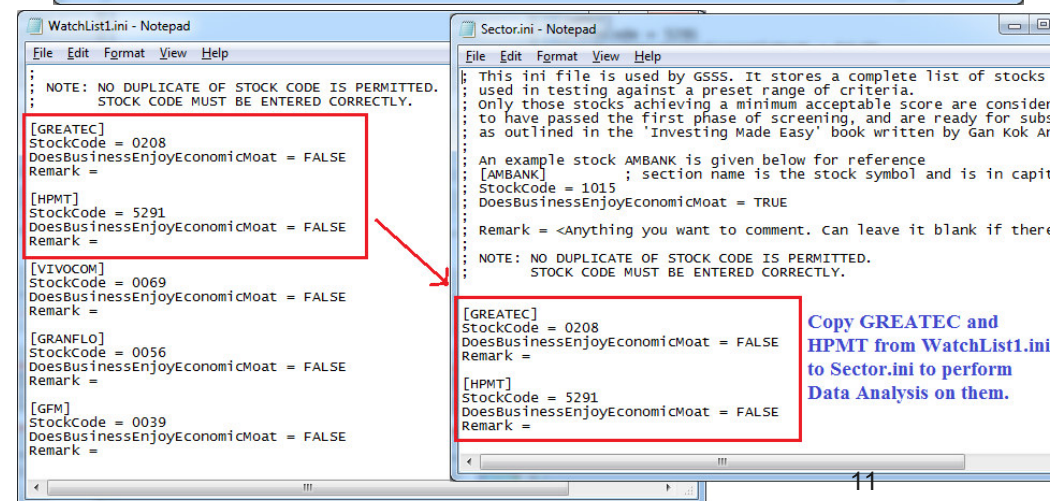

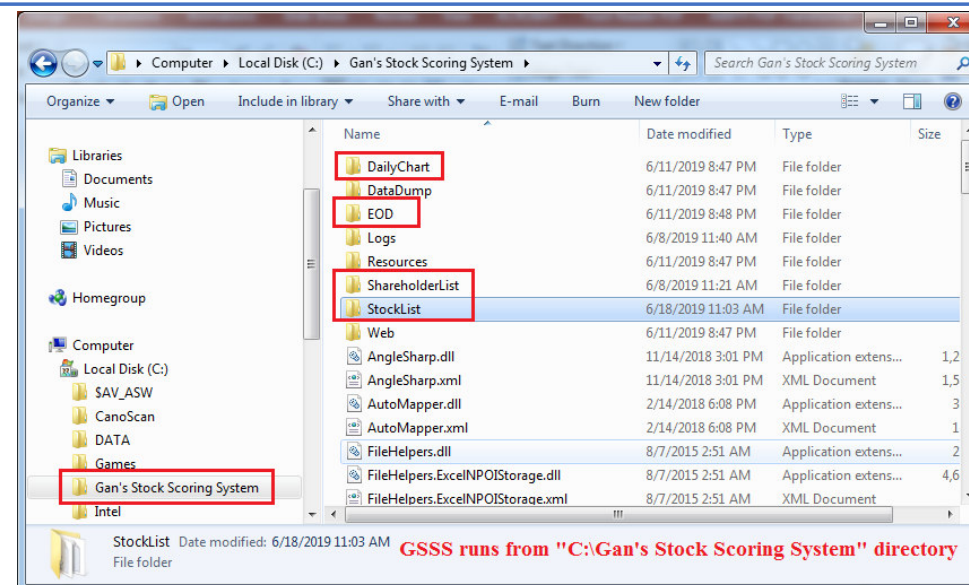

Note: When running GSSS, you MUST ensure that all PDFs created by it are not opened for viewing.

Insight Into The Directory Structure Of GSSS For Computer

- Once the installation of GSSS completes, all files will reside in C:\Gan's Stock Scoring System. They include:
 - HowToRegisterGSSS.txt – Explains the steps involved in registering/subscribing GSSS.
 - **LicenseKey.txt and Authentication – Detects the validity of user subscription.**
 - Database (.db) files for storing the financial data.
 - Repository for various generated PDF reports like Data Analysis, Final Pass List, Standard Queries.
- In addition, it also contains some important subdirectories:
 - DailyChart – Storage of various historical charts.
 - EOD – Storage of historical closing price database.
 - Logs – Records all user activities. Can find out the name of the last updated stock from here.
 - ShareholderList – Names of prominent individual as well as institutional fund to search for their appearances among the stocks.
 - StockList – Different types of stock lists. This is where user often configures the stocks he wants to monitor. All he needs to do is just copy the stock record from WatchList1.ini to another stock list like Sector.ini and then perform Data Analysis on Sector.ini.

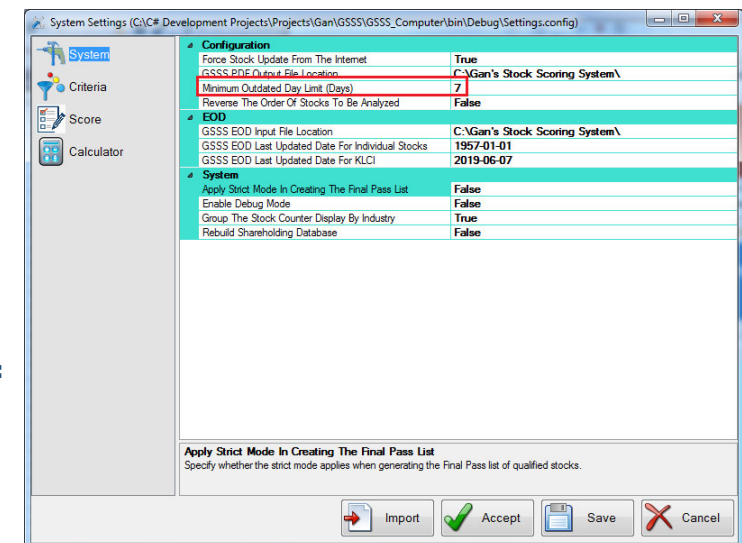

Stock Category Explained

- These are the supported stock categories:

- ☐ **New Results** – GSSS downloads stocks which have recently released either quarterly results or annual report and are more recent than the what is stored in the database. Created by GSSS, no user intervention required.
- ☐ **My Favourite** – List of stocks user monitors. The list is maintained by user.
- ☐ **Portfolio** – Stocks in user's portfolio. The list is maintained by user.
- ☐ **Dividend** – Steady dividend stock list. The list is maintained by user.
- ☐ **High Growth** – High growth stock list. The list is maintained by user.
- ☐ **WatchList 1** – A complete listing of all stocks listed on Bursa Malaysia. Created by GSSS, no user intervention required.
- ☐ **Top Favourite** – A consolidated list of favourite stocks picked by all GSSS subscribers. Created by GSSS, no user intervention required.
- ☐ **Top Ranking** – A list of top ranked stocks. Created by GSSS, no user intervention required.
- ☐ **High Rating** – Captures stocks with high user rating. Created by GSSS, no user intervention required.
- ☐ **Outdated Data** – Stocks that have not been updated recently. Created by GSSS, no user intervention required.
- ☐ **Invalid Data** – Stocks with invalid data such as intrinsic value = 0, PE = -999 etc. Created by GSSS, no user intervention required.
- ☐ **High Q Score** – Stocks with high Company Quality Score. Created by GSSS, no user intervention required.
- ☐ **Note: if you often leave your computer running whole day, you should perform Data Analysis on 'Outdated Data'.**

Stock Manager

- Clicking on the Stock Manager button will bring out the Notepad editor for editing a list of stocks intended for analysis.
- Every configuration of each individual stock counter must conform to the following strict rules:
 - Every section begins with the stock symbol and is enclosed with [and].
 - The value of StockCode must be unique and correct.
 - The value of DoesBusinessEnjoyEconomicMoat must be either TRUE or FALSE.
 - **The value of EnableLinearRegression must be either TRUE or FALSE. When set to FALSE, GSSS will skip engaging A. I. to plot the linear regression chart on historical stock prices.**
 - The value of Remark is for user to add in any personal comment associated with the stock.
- **Note: WatchList1.ini comes with a complete set of listed companies' code and symbol. User only needs to edit the value of DoesBusinessEnjoyEconomicMoat.**
- **Outdated and Invalid stock lists are generated internally. Outdated refers to stocks that were updated beyond the Minimum Outdated Day Limit setting, whereas Invalid refers to stocks that either have a PE ratio of -999.9 or 0 and therefore require Data Analysis operation.**

```

Prominent Shareholding

- Clicking on the shareholding button will bring out the Notepad editor for editing a list of substantial shareholders, both individual investors and funds that we are interested to know which stock counters they heavily invest in.
- We can greatly enhance our investment success by either following these successful masters' footsteps or avoiding stocks that these notorious shareholders own.
- Every line in Shareholder.txt denotes the name of the shareholder we would like to track his shareholding.
- Based on my in-depth analysis, I discovered that there are many successful yet very low profile investors in Malaysia (at least 20 low profile multi-millionaires) . With GSSS, they can no longer shun the limelight 😊.

```
Shareholder.txt - Notepad
File Edit Format View Help
: This text file is used by GSSS to track stock counters held by renowned
: shareholders (individual or fund) based on the partial names entered.
:
: Three examples of famous investors Fong Siling, Koon Yew Yin and Dynaquest
: are Included here as sample for demonstration. The name and the type of
: prominent shareholder (either I or F) is separated by a colon (:). If the shareholder is considered
: special (S) or notorious (N), then we add a 'S' or 'N' letter right after 'I' or 'F',
: separated by colon (:) too.
: For a special or notorious shareholder, we can also add some notes to describe the person.
: Koon Yew Yin: I : I denotes Individual
: Fong Siling: I: S: (Cold Eye) wrote a few bestselling books on stock investment.
: Dynaquest: F : F denotes fund
:
: NOTE: NO DUPLICATE OF SHAREHOLDER NAME IS PERMITTED.
:
Koon Yew Yin: I
Fong Siling: I: S: (Cold Eye) wrote a few bestselling books on stock investment.
Tey Por Yee: I: N: Involved in a few law suits
Dynaquest: F
```

KLSE Calculator

- As shown in Figure 6, KLSE Calculator provides useful features to compute:
 - Potential Investment Return Using The Kelly Criterion
 - Stock Purchase/Disposal Cost
 - Stock Transaction Profit/Loss
 - Compound Interest
 - Dividend Yield

The screenshot shows the 'KLSE Calculator' window with the 'Investment Return' tab selected. The 'Kelly Criterion' tab is also visible. The form contains the following fields and values:

Field	Value
Stock Symbol	[Redacted]
Stock Code	[Redacted]
Anticipated Investment Success	50 %
Expected Holding Duration	12 Months
Current Price: RM	[Redacted]
Expected Highest Price To Reach: RM	0.00
Expected Lowest Price To Reach: RM	0.00

A 'Compute Annual Return' button is located at the bottom of the form.

The screenshot shows the 'KLSE Calculator' window with the 'Buy or Sell' tab selected. The 'Investment Return' tab is also visible. The form contains the following fields and values:

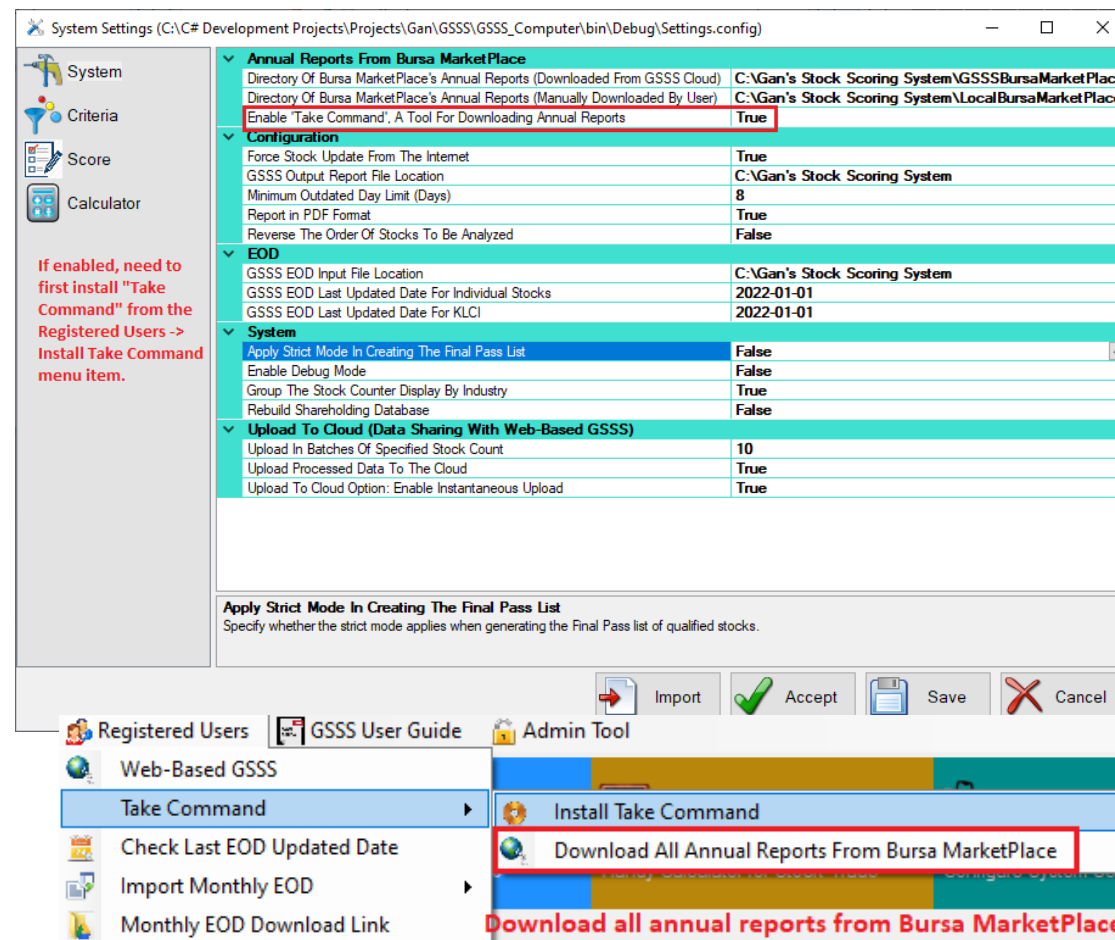

Field	Value
Brokerage	0.1 %
SST	6 %
Clearing	0.03 %
Stamp Duty: RM	1 per RM1000
Buy or Sell	Buy (selected)
Price: RM	0.00
Quantity	0 units
Total	0.00

Figure 6 – Handy KLSE Calculator

GSSS For Computer's System Settings

- All the criteria set forth in GSSS are fully configurable and they are editable in the System Settings editor.
- GSSS settings are divided into 4 groups:
 - System – Allow user to specify the PDF output file directory.
 - Criteria – User can customize data analysis criteria which will alter the overall analysis results.
 - Score – Different weightage score can be assigned to each criterion, based on user's personal preference.
 - Calculator – Handy calculator for computing dividend yield, stock trade amount incurred etc.
- **Take note of the importance of the 'Annual Reports From Bursa MarketPlace' settings, especially the use of 'Take Command' to download all annual reports.**
- **If any of the settings in the Score or Criteria section is modified, user must perform Data Analysis again for the new changes to take effect.**
- **It is important to note that the analysis results may vary among users, as everyone is free to customize various system settings to suit his preference.**

Extremely Important settings

- Since early December 2021, GSSS no longer has access to several portals that previously provided free financial data. It took me quite a big effort to address this urgent issue, and the solution is to use the free annual reports provided by Bursa MarketPlace at <https://www.bursamarketplace.com>.

As soon as GSSS starts up, user need to click "Step 1: Upload To & Download Annual Reports From Cloud (Once A Day)" before running Data Analysis. This is required once per day.

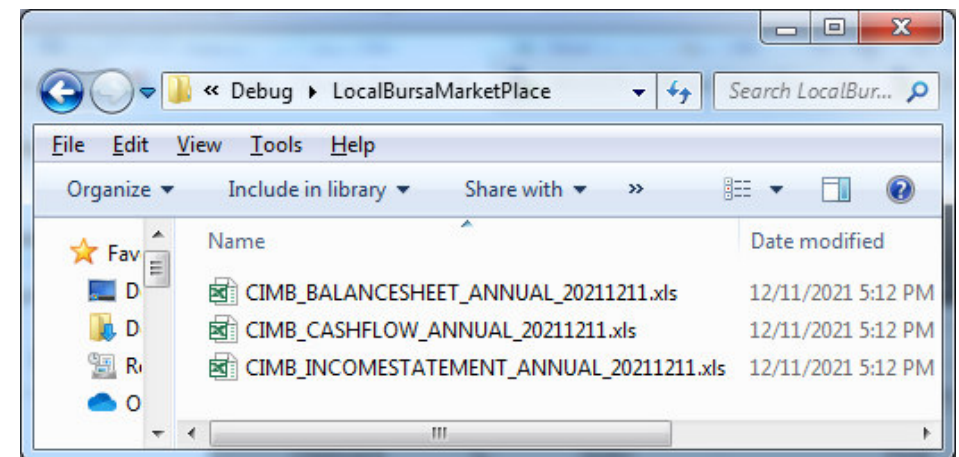

- Prior to performing Data Analysis on each stock, user has to manually download 3 Excel formatted annual reports and store them in C:\Gan's Stock Scoring System\LocalBursaMarketPlace directory if GSSS detects that they are missing. Data Analysis cannot proceed if the reports are missing or incomplete.**
- In addition, you MUST store the hyperlinks (URL) of these 3 files in the Gsheets below:**
<https://docs.google.com/spreadsheets/d/12iXgYW0AFDy-8cpCx0L6NkKT8OMNC6SDiQWEhq2FXPY/edit#gid=0>
- To do so, a user login account is required by Bursa MarketPlace.

Manually Download Annual Reports From Bursa MarketPlace (2 of 2)

The screenshot shows the BursaMarketplace website for CIMB. The browser address bar is `bursamarketplace.com/mkt/themarket/stock/CIMB/financials_IS`. The page has a search bar with a lens icon and a note: "Click on the lens icon to search for a stock". A button "Switch to New Stock Ticket Page" is circled in red with the text "I prefer the classic display mode". Below, the "FINANCIALS" tab is selected. Under "Step 1: select report type, either Income Statement, Balance Sheet or Cash Flow", the "INCOME STATEMENT" button is circled in red. Below that, under "Step 2: Select Annual", the "ANNUAL" button is circled in red. At the bottom right, under "Step 3: Click Download to store the annual report on your local drive", the "Download" button with a download icon is circled in red. The price of CIMB is shown as 5.1.

- To facilitate the download, classic view is preferred.
- **Prior to performing Data Analysis on each stock, user has to manually download 3 Excel formatted annual reports and store them in C:\Gan's Stock Scoring System\LocalBursaMarketPlace directory if GSSS detects that they are missing. Data Analysis cannot proceed if the reports are missing or incomplete.**
- **Say you want to analyze "CIMB", just click on the search lens icon and enter "CIMB". As soon as its data shows up, click the Financials tab to download all 3 Excel files. They MUST be stored in C:\Gan's Stock Scoring System\LocalBursaMarketPlace directory within GSSS.**
- **Note: You must leave the default file name unchanged.**

Some Useful Tips On Important GSSS For Computer System Settings

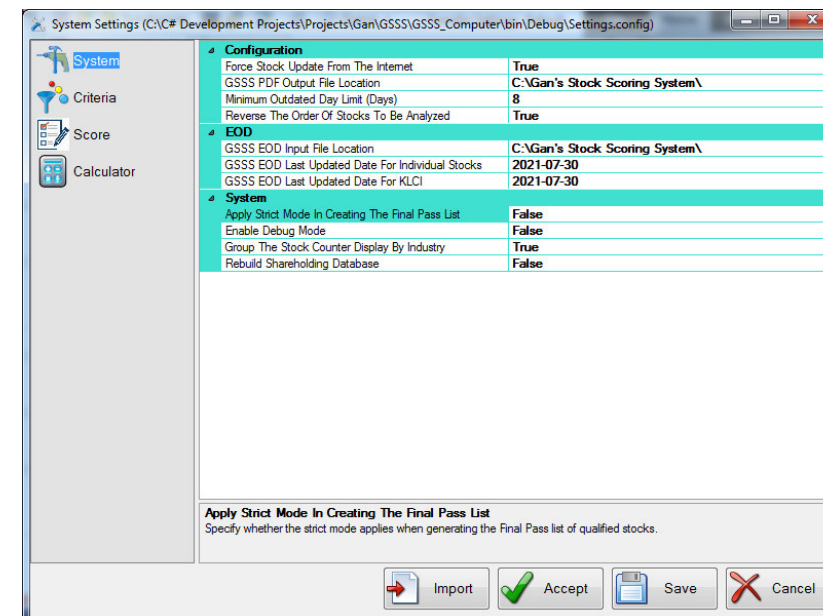

- The System Settings section is divided into three subgroups, namely:
 - ❑ Configuration
 - Force Stock Update From The Internet – When set to “False”, GSSS will skip data download from the Internet if the last update was performed within the past 5 days.
 - **Reverse The Order Of Stocks To Be Analyzed – When set to “True”, the data download will begin from the back of the stock list. This is useful if you have a long stock list.**
 - ❑ EOD
 - GSSS Last Updated Date For Individual Stocks – Whenever EOD on individual stocks has completed with success, the latest EOD date is stored here. Registered user needs to perform EOD update every month.
 - GSSS Last Updated Date For KLCI – Whenever EOD on KLCI has completed with success, the latest EOD date is stored here. Registered user needs to perform EOD update every month.
 - ❑ System
 - Apply The Strict Mode In Creating The Final Pass List – When set to “True”, any counter that’s fail the good stock criteria (like Honest Management, DY > 2.5%, Overall Score > 40, etc.) will not appear in the Final Pass List report.
 - Group The Stock Counter Display By Industry – When set to “False”, all the stock counters will be lumped together in the same table for display.
 - Rebuild Shareholding Database – When set to “True”, the existing shareholding database is deleted first before rebuild. For your information, By default, GSSS NEVER deletes any shareholding data it gathers. So even if a prominent shareholder disposes all his shares recently, his name will still appear unless user specifically set this setting to “True”.
 - ❑ PDF Report
 - **Configure PDF Report’s Paper Size For Printing – The print out appears much better if A3 is selected.**
- Below are the important settings from the Criteria Settings section:
 - Keywords That Define Cyclical Sectors and Keywords That Define Sectors To Ignore Net Cash Holding And Debt – Each keyword MUST be separated by “@”

Useful Tips For Routine Financial Data Updates

- The records of all listed companies are stored in WatchList1. User is **NOT ALLOWED** to remove any existing stock records from WatchList1, except for altering the value of “DoesBusinessEnjoyEconomicMoat”.
- By default, the “Use Cloud Computing” checkbox is checked which means the bulk of Data Analysis computation is carried out in Cloud. Clicking on the Data Analysis button will download the recently processed database files from Cloud. Thereby greatly speeds up the generation of Data Analysis report.
- Since the main objective of GSSS is to disqualify bad stocks, user should copy a small number of good stocks to Favourite or Portfolio, to greatly speed up the Data Analysis process, whenever the “Use Cloud Computing” checkbox is unchecked, which downloads the financial data directly from the relevant websites. The financial data update of these good stocks can be carried out several times in a month, especially during the releases of quarterly results.
- Beginning in version 9.1.2, GSSS comes with a very useful feature called “New Results”. This feature detects all recently released quarter results as well as annual reports. GSSS will download the update the financial data of those recently released results. By regularly selecting this “New Results” feature, user no longer needs to choose WatchList1 to perform Data Analysis.
- Next, user should conduct Final Pass List (Second Phase) operation.

Note: Newly listed companies (less than 1 year ago) should be skipped as they do not have the financial data, failing which GSSS may display error message.

Highlighting The Best Stocks

- User is encouraged to make use of Best.txt to differentiate the displayed of their favourite stocks from others.
- In order to add a new stock entry into Best.txt, just enter its stock symbol in the file, as illustrated below.

```
Best.txt - Notepad
File Edit Format View Help
; This text file is used by GSSS to distinguish best stocks from the rest
; by highlighting them with different colours.

3A

ABMB
ADVPKG
AEONCR
AFFIN
AHEALTH
```

How To Discern The Colour Coding Of Stock Display

- In displaying the stock code and symbol, GSSS resorts to the use of the follow colour schemes:
 - Black background with yellow italic test like BPPLAS – Last two consecutive quarters or financial years show earnings growth, belongs to the Best Stock category.**
 - Black background with white italic test like JOHOTIN – Last two consecutive quarters or financial years show earnings growth, ordinary stock.**
 - Violet background with yellow text like SLP – No consecutive growth in the last two quarters and financial years, belongs to the Best Stock category.
 - White background with light blue text like NOTION – No consecutive growth in the last two quarters and financial years, ordinary stock.
 - Red background with black text like DATAPRP – Company with potential accounting fraud, dishonest management or high occurrences of negative FCF, MUST avoid such stock counter.**
- Apart from that, an * prior to stock code and symbol indicates the presence of prominent shareholder.

*BPPLAS	*5100
*JOHOTIN	*7167
*SLP	*7248

*NOTION	*0083
---------	-------

DATAPRP	8338
---------	------

Understanding The Importance Of Piotroski F-Score

- Piotroski F-Score is an indicator created by a US accounting professor, Joseph Piotroski, to identify a company's financial resilience so that investors know whether the company can survive all kinds of business challenges.
- Piotroski F-Score's total score ranges between 0 and 9. The higher the score, the stronger the company's financial position.
- If a company has a score of only 1 or 2, which means the company may face operational problems, we should avoid it. Conversely, a company with 8 or 9 points is a quality company worthy of our attention.

- **Note: When using GSSS, we should pay attention to the following three key points:**
 - **The Score calculated by Data Analysis (First Phase) .**
 - **The trends shown in the Final Pass List (Second Phase).**
 - **Piotroski F-Score displayed in the Final Pass List (Finally reflecting the company's financial position) .**

<u>Piotroski Criteria</u>	<u>Boolean Value Score</u>	
Positive Net Income?	TRUE	1
Positive ROA?	TRUE	1
Positive OCF?	TRUE	1
OCF > Net Income?	TRUE	1
Increased Current Ratio?	TRUE	1
Decreased Long-Term Debt?	FALSE	0
Recent Rights Issue?	FALSE	1
Increased Net Profit Margin?	TRUE	1
Increased Asset Turnover?	TRUE	1
Overall Score:	8 GOOD	

Warren Buffett's Stock Selection Rule

- The score derived from Warren Buffett's Stock Selection Rule ranges between 0 and 10.
- The higher the score is, the better is its quality.
- A score of at least 5 signifies it has passed the yardstick.

<u>AAA Bond</u> <u>Warren</u>	<u>Interest Rate: 2.40,</u> <u>Buffett's Stock</u>	<u>Last Update:</u> <u>Selection</u>	<u>2020-06-25</u> <u>Rule</u>
No	Criterion	Actual Result	Evaluation
1.	Latest PE $\leq 3 \times$ AAA-Rated Bond Interest?	$9.74 \leq 7.20?$	FAIL
2.	Latest P/NTA $\leq 0.75 \times$ Average P/NTA?	$1.35 \leq 1.13?$	FAIL

Total Buffett Score:		5 Out Of 10	PASS

Cold Eye's Ultimate Stock Selection Rules

- In his latest stock investment book released in 2020m Cold Eye (冷眼) shared out his ultimate stock selection rules which are divided into the GDP and PRC categories.
- GDP refers to wealth creation while PRC refers to wealth preservation. For any stock to pass the yardstick, it must score at least 50 marks in each of the category.

Cold Eye's Stock Selection Rules

Wealth Creation Formula: GDP

No.	Criterion	Actual Result	Score
1	Growth (G): Average CAGR of Revenue and EPS	11.32%	40
2	Dividend (D): Average Dividend Yield (DY)	0.64%	5
3	PE (P): Latest PE Ratio	12.81	20
		Total Score:	65 (PASS)

Wealth Preservation Formula: PRC

No.	Criterion	Actual Result	Score
1	Net Profit Margin (P): Average Net Profit Margin	4.89%	5
2	ROE (R): Latest ROE	12.42%	30
3	Cash Flow (C): Latest Cash Flow Versus EPS	10.22 Sen vs 38.65 Sen	40
		Total Score:	75 (PASS)

Overall GDP + PRC Verdict: **PASS**

Jim Slater's Zulu Investing Principles

- GSSS adapted the original Zulu Investing Principles proposed by Jim Slater in his best selling books to suit our local investment environment.
- Possible score ranges between 0 and 8 inclusive. The higher the score is, the better is a stock's superiority.
- A score of at least 5 signifies it has passed the yardstick.

Adaptation of The Zulu Investing Principles (To Suit Local Scene)

No.	Criterion	Actual Result	Evaluation
1	PEG ≤ 1 ?	0.30 \leq 1.00?	PASS
2	Latest PE ≤ 10 ?	12.36 \leq 10.00?	FAIL
3	Latest FCF Per Share ≥ 0.0 Sen And Positive FCF Count Ratio ≥ 0.50 ?	10.24 Sen ≥ 0.0 Sen And 0.50 ≥ 0.50 ?	PASS
4	Net Gearing Ratio ≤ 2.00 ?	0.50 ≤ 2.00 ?	PASS
5	Latest ROIC $\geq 7.00\%$ And Net Profit Margin $\geq 5.00\%$?	35.73% $\geq 7.00\%$ And 5.09% $\geq 5.00\%$?	PASS
6	Any Recent Net Transactions Of Shares By Directors?	0 ≥ 0 ?	PASS
7	Latest Earnings Growth $\geq 5.00\%$?	41.01 $\geq 5.00\%$?	PASS
8	Is Continuous Dividend?	True = TRUE?	PASS
Total Score:		7 Out Of 8	PASS

Accounting Fraud Detection And Risk Assessment

- The famous quote by Warren Buffett which says, "Rule No. 1: Never lose money. Rule No. 2: Never forget rule No. 1." stresses the importance of vigilant when it comes to stock investment.
- Once we iron out all these potential pitfalls that lead to investment failures, we stand to make profit from the market.
- The new Potential Accounting Fraud as well as Risk Assessment features serve to assist users in eschewing investment losses.
- The Beneish M-Score value of above 0 indicates high likelihood of accounting fraud.
- On top of that, the Balance Sheet Accrual Ratio or Cash Flow Accrual Ratio with a value beyond the range of between -20% to 25% raises suspicion on the authenticity of the financial figures.

Potential Accounting Fraud		
+ve FCF /	+ve EPS Ratio: 50.00%

Judging The Superiority Of A Stock

- After considering all the four previously stated yardsticks which include Data Analysis' Overall Score, Final Pass List's Overall Trend Score, Magic Formula and also Piotroski F-Score, we come to the MOST important yardstick, which is the Company Quality Score.
- The Company Quality Score is the MOST effective gauge that, at a glance will immediately enlighten us whether a stock is considered to be of 5-star rated or not.**
- By default, any stock that scores 65% or above is considered to be of top quality. A score of 30% or below signifies a bad stock.

The Ultimate Investment Gauge: Mind Map Flow Chart

- Leveraging from various indicators, I devised this Mind Map Flow Chart to assist user in making stock purchase decision.
- The Mind Map Flow Chart summarizes all essential indicators and present them in pictorial form, grouped into 10 different levels.
- The higher the level, the better is the stock in term of its quality and pricing.
- For safety sake, only stock reaching either Level 9 or Level 10 is considered worth buying.

Definitions Of Common Indicators

$\text{Current Ratio} = \frac{\text{Current Assets}}{\text{Current Liabilities}}$	$\text{Margin Of Safety} = \frac{\text{Intrinsic Value} - \text{Price}}{\text{Intrinsic Value}} \times 100\%$
$\text{Debt Ratio} = \frac{\text{Total Debts}}{\text{Total Assets}} \times 100\%$	$\text{DY} = \frac{\text{Dividend}}{\text{Price}} \times 100\%$
$\text{Net Cash} = \text{Cash On Hand} - \text{Total Debts}$	$\text{Free Cash Flow} = \text{Operating Cash Flow} - \text{Capex}$
$\text{Net Gearing Ratio} = \frac{\text{Total Liabilities}}{\text{Shareholders' Equity}}$	$\text{SGA Expense} = \text{expenses other than the cost of goods like salary etc.}$
$\text{PE} = \frac{\text{Price}}{\text{Earnings}}$	$\text{PEG} = \frac{\text{PE}}{\text{Earnings Growth}}$
$\text{ROE} = \frac{\text{Net Income}}{\text{Shareholders' Equity}} \times 100\%$	$\text{ROIC} = \frac{\text{Net Income}}{\text{Shareholders' Equity} + \text{Total Debts}} \times 100\%$
$\text{ROA} = \frac{\text{Net Income}}{\text{Total Assets}} \times 100\%$	$\text{CY} = \frac{\text{Free Cash Flow Per Share}}{\text{Share Price}} \times 100\%$
$\frac{\text{ROE}}{\text{PB}} = \frac{\text{ROE}}{\text{Price}} \times \text{Book Value}$	$\text{Graham's Max Price} = \sqrt{(\text{PE} \times \text{PB} \times \text{EPS} \times \text{Book Value})}$
Joel Greenblatt's Magic Formula	
$\text{ROIC} = \frac{\text{EBITDA}}{\text{Net Fixed Assets} + \text{Working Capital}} \times 100\%$	$\text{Earnings Yield, EY} = \frac{\text{EBITDA}}{\text{Market Capital} + \text{Total Debt} + \text{Minority Interest} - \text{Cash On Hand}} \times 100\%$

Brief Introduction To Indicators For Fundamental Analysis (1)

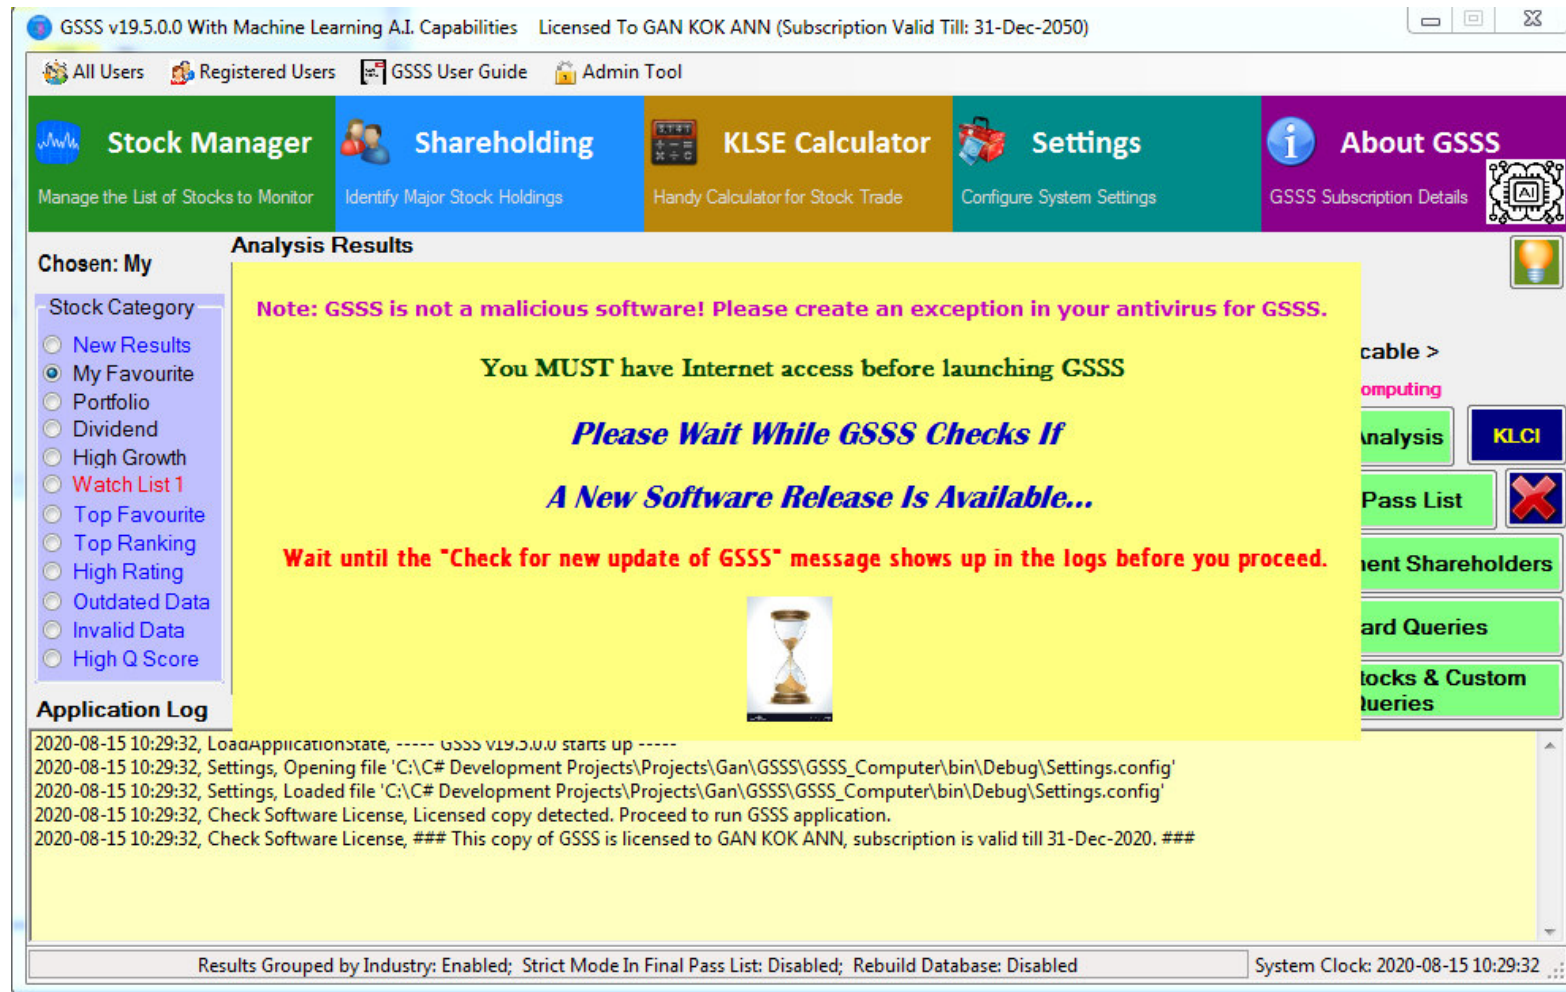

Indicator	Explanation
ROE (Return On Equity)	Used to measure management's operational capabilities. For example, ROE=15% means that the RM100 invested by the company will bring a return of RM15.
PE (Price to Earnings)	Used to estimate how long it will take to "earn back" the money we invested. For example, PE=10 means that the company needs to accumulate earnings per share for the next 10 years to "return" our money.
DY (Dividend Yield)	The dividend per share divided by the stock price is used to compare with the bank's fixed deposit rate, preferably twice of that.
PEG (PE Growth)	The price-earnings ratio is divided by the profit growth rate. Even if a high-quality company has a high PE, as long as its PEG is less than 1, it means the stock is reasonable priced, because people are willing to buy stocks of high-quality companies at high prices.
D/E (Debt to Equity)	It refers to the ratio of total debt to owner's equity at the end of the reporting period, which reflects the long-term solvency of the company. The ideal D/E ratio should be lower than 0.5.
Net Gearing Ratio	Reflects the extent to which the company relies on debt financing. The ideal data is less than 2.
SG&A Expense	Refers to expenses related to administrative activities such as rentals and salaries, but does not include the cost of producing products.
Current Ratio	The current assets of a company are divided by current liabilities to measure whether the company is able to repay its short-term debt in the short term. The ratio is preferably higher than 2.
Operating Cash Flow	The cash flow generated in the operation of the enterprise can best reflect the true sustainable operation ability and future development prospects of the enterprise.
Capex (Capital Expenditure)	Refers to the fees paid for obtaining fixed assets or extending the durability of fixed assets.
Free Cash Flow	Refers to the freely available cash flow, which is the balance after deducting capex from operating cash flow.

Brief Introduction To Indicators For Fundamental Analysis (2)

Indicator	Explanation
Debt Ratio	Total debt divided by total assets. Ideally, the figure should be less than 50%.
ROIC (Return On Invested Capital)	Measures how well the invested capital has been utilized in generating net income, should be greater than 10%.
Net Profit Margin	After deducting all the overheads, how much the derived net profit weighs in regard to the revenue.
Revenue Growth	When compared to previous fiscal year, how much the revenue has changed. It measures how resilient a company in maintaining growth.
Earnings Growth	Like revenue growth, this indicator gauges the strength of a company ingrowing its business.
SG&A/Revenue	The ratio between SG&A and revenue. Should be less than 30%
Price/FCF	Share price divided by free cash flow, should be less than 7.
Debt/Net Profit	Total debt divided by net profit, should be less than 3.
Capex/OCF	The weightage of capex with respect to net operating cash flow, should be less than 30%.
FCF/Revenue	How much free cash flow take up in comparison to the revenue, should be more than 5%.
OCF/Net Profit	The ratio of net operating cash flow to net profit, should be more than 1.5.
Cash Yield or CY	The ratio of free cash flow to the share price. It should be at least twice the annual fixed deposit interest rate.
ROA (Return On Assets)	An indicator of how profitable a company is relative to its total assets.

GSSS' Splash Screen

GSSS For Computer In Action

- Internet access is a pre-requisite for running GSSS. Once the Internet access is available, user needs to first select the appropriate stock category for performing data analysis. **After that, user needs to click “Step 1: Upload To & Download Annual Reports From Cloud (Run Once)”. This is done once per day.**
- Next, user has to click on the “Data Analysis” button to initiate the data analysis process. Along the way, the progress is displayed in the form of scrolling application logs and updated progress bar. As soon as a stock counter has been analyzed, its result summary is added to the Analysis Results list view display. Once the data analysis has completed, the associated PDF file is automatically opened for viewing.
- It is then advisable to click on the “Final Pass List” button to further screen the analysis results, by limiting the output to just good stocks. A separate PDF file is created.
- User can also click on the “Shareholders” button to identify which stock counters specific shareholders hold, so that we may consider follow their footsteps.
- Since all data are stored in the database, users can click on the “Standard Queries” button to execute predefined queries. Apart from that, the “Custom Queries” button is clicked if user wishes to customize the queries, such as the stocks with margin of safety, companies that generate positive free cash flow, and so on.
- User can always click  to abort any running task at any time.
- **Once the reports in PDF format have been created, user may transfer them to mobile phone for easy access wherever he is at anytime.**

Note: Newly listed companies (less than 1 year ago) should be skipped as they do not have the financial data, failing which GSSS may display error message.

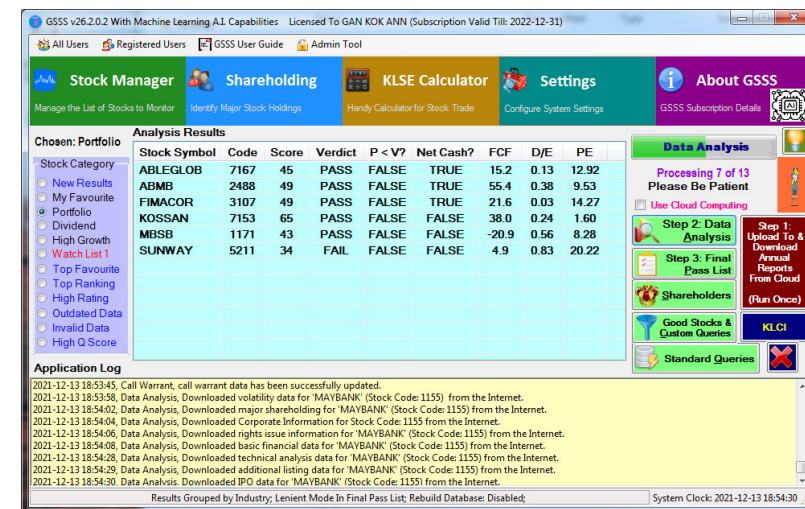

Figure 11 – GSSS In Action

Leveraging On GSSS To Discern Quality Stock And Whether It Is Undervalued

Preference For Valuation Over Superiority Model: Achieved Level 1

Level 1	Prestigious Stock's Valuation Hit 0.00% ≥ 35.00%?	Price < Graham Max RM 0.575 < RM 0.700?	Price < Price Target RM 0.575 < RM 0.390?	Price < Takeover Price RM 0.575 < RM 0.594?	Price < Intrinsic Value RM 0.575 < RM 0.667?	Price < Book Value RM 0.575 < RM 0.810?	Price < A. I. Straight Line	Price < Net Current Asset RM 0.575 < RM 0.480?	Price < Shareholders' Equity RM 0.575 < RM 0.810?	Price < ESOS RM 0.575 < RM 0.460?
Level 2					25% Margin Of Safety 13.76% ≥ 25.00%?					
Level 3	Cash Flow Accrual Ratio 33.33% ≤ 40%?	Accounting Fraud 8.70% ≤ 55%?				Beneish M-Score -2.19 ≤ 0?		BS Accrual Ratio 20.00% ≤ 40%?		
Level 4 (Min 2)	Rare Rights And Consolidation	Data Analysis Score 30 ≥ 40?		Good Count 13 ≥ 8?		Warren Buffett Rules 6 ≥ 5?		ColdEye's GDP + PRC 60 ≥ 50 & 55 ≥ 50?		
Level 5 (Min 2)		Company Quality Score 63.45% ≥ 60.00%?		Shareholders (Special - Notorious) (3 - 0) > 0?		Summary 31 ≥ 22?				
Level 6 (Min 2)	Piotroski F-Score 3 ≥ 5?	Altman Z-Score 2.46 ≥ 3? (Ignore For Financial Sector)		Overall Trend Score 9 ≥ 4?		Ratio Charts 22.00% ≥ 50%?		Magic Formula 10.37% ≥ 10%?	Low Risk	
Level 7 (Min 3)	PE & PEG	D/E, Net Cash, EPS Trends	D/E & Debt Ratio & Gearing (Ignore For Financial Sector)	ROE & (ROA or ROIC)	OCF 0.67 ≥ 0.6?	PE/ROE & ROE/PB	Net Income & Cash Flow	Retained Earnings	Continuous Decent DY	
Level 8 (Min 2)		FCF Count Ratio 0.71 ≥ 0.5?		Price / OCF 0 < -3.50 < 10.00?		Top Ranking 38.51% ≤ 10%?		Total Shareholder Return 14.32% > 0%?		
Level 9 (Min 3)		EPS Count Ratio 1.00 ≥ 0.6?		Geometric Mean 0 ≥ 2?		Zulu Principles 3 ≥ 5?		OCF / Net Profit -3.816 ≥ 1.5 And 5 > 0 And -27946 > 0?	Subscribers' Favourite 7.69% ≥ 25%?	
Level 10 (Min 2)		Growth Stock		Prestigious Stock 16 ≥ 16?		Dividend Stock		Above Industry Averages 40 ≥ 38?		

How The Ultimate Level Is Derived

If The Superiority Model Yields At Least Level 8 Or Greater Than The Valuation Model, It Is The Ultimate Level. Else Take The Average Value Of The Two Models To Be The Ultimate Level.

Preference For Superiority Over Valuation Model: Achieved Level 6

Level 1	Cash Flow Accrual Ratio 33.33% ≤ 40%?	Accounting Fraud 8.70% ≤ 55%?		Beneish M-Score -2.19 ≤ 0?	BS Accrual Ratio 20.00% ≤ 40%?					
Level 2 (Min 2)	Rare Rights And Consolidation	Data Analysis Score 30 ≥ 40?	Good Count 13 ≥ 8?	Warren Buffett Rules 6 ≥ 5?	ColdEye's GDP + PRC 60 ≥ 50 & 55 ≥ 50?					
Level 3 (Min 2)		Company Quality Score 63.45% ≥ 60.00%?	Shareholders (Special - Notorious) (3 - 0) > 0?	Summary 31 ≥ 22?						
Level 4 (Min 2)	Piotroski F-Score 3 ≥ 5?	Altman Z-Score 2.46 ≥ 3? (Ignore For Financial Sector)	Overall Trend Score 9 ≥ 4?	Ratio Charts 22.00% ≥ 50%?	Magic Formula 10.37% ≥ 10%?	Low Risk				
Level 5 (Min 3)	PE & PEG	D/E, Net Cash, EPS Trends	D/E & Debt Ratio & Gearing (Ignore For Financial Sector)	ROE & (ROA or ROIC)	OCF 0.67 ≥ 0.6?	PE/ROE & ROE/PB	Net Income & Cash Flow	Retained Earnings	Continuous Decent DY	
Level 6 (Min 2)		FCF Count Ratio 0.71 ≥ 0.5?		Price / OCF 0 < -3.50 < 10.00?		Top Ranking 38.51% ≤ 10%?		Total Shareholder Return 14.32% > 0%?		
Level 7 (Min 3)		EPS Count Ratio 1.00 ≥ 0.6?		Geometric Mean 0 ≥ 2?		Zulu Principles 3 ≥ 5?		OCF / Net Profit -3.816 ≥ 1.5 And 5 > 0 And -27946 > 0?	Subscribers' Favourite 7.69% ≥ 25%?	
Level 8 (Min 2)		Growth Stock		Prestigious Stock 16 ≥ 16?		Dividend Stock		Above Industry Averages 40 ≥ 38?		
Level 9	Prestigious Stock's Valuation Hit 0.00% ≥ 35.00%?	Price < Graham Max RM 0.575 < RM 0.700?	Price < Price Target RM 0.575 < RM 0.390?	Price < Takeover Price RM 0.575 < RM 0.594?	Price < Intrinsic Value RM 0.575 < RM 0.667?	Price < Book Value RM 0.575 < RM 0.810?	Price < A. I. Straight Line	Price < Net Current Asset RM 0.575 < RM 0.480?	Price < Shareholders' Equity RM 0.575 < RM 0.810?	Price < ESOS RM 0.575 < RM 0.460?
Level 10					25% Margin Of Safety 13.76% ≥ 25.00%?					

First, identify a prestigious stock.

Next, ensure it is undervalued before loading it up.

GSSS supports two models, with preference switches between superiority and valuation respectively.

Note: A stock is deemed worth buying if it reaches either Level 9 or 10.

Utilize GSSS For Computer To Detect The Market Trend Ahead Of Others

- Whenever registered user hits the KLCI  button, GSSS will produce a KLCI market trend report, using data as early as in 1977.
- One of the charts first converts the daily closing index to Natural Log and then uses Linear Regression to display a long-term straight line (as shown below). There is another chart showing the 6-month lagging relationship between GDP and KLCI.
- **Whenever the index deviates too far from the straight line, it means the bull market if it is at the extreme peak. Otherwise it is the bear market when it is at the extreme trough.**
- By applying this method to the past bull and bear markets, we can how accurate it is in detecting the

Steps Involved In Activating the Annual GSSS For Computer Subscription

- Once you select the “Subscribe GSSS” command from the “All Users” menu, you will come across the handy dialogs that let you enter the Subscription Code as well as email your personal particulars to Mr. Gan Kok Ann.
- Once Mr. Gan Kok Ann receives your email, he will initiate GSSS to send out an email to you. This email contains 2 attachment files, namely ‘Authentication’ and ‘LicenseKey.txt’. **You need to copy them to C:\Gan’s Stock Scoring System folder, overwriting the existing copy.** That’s it!

The GSSS Subscription Form dialog box shows the detected MAC address as 00:05:5D:2E:23:4C. The current year subscription code is marked as <INVALID LICENSE>. There are three buttons at the bottom: 'Email MAC Address To Gan Kok Ann', 'Activate Current Year's Subscription', and 'Close'.

Your Valid License Key Throughout This Year

Brought specially to you by . GSSS for Computer's Registration Code.

Option (1) [Most preferred]: Copy the email attachment 'Authentication' file to C:\Gan's Stock Scoring System\ folder, overwriting the existing copy there.

Or Option (2): Please apply the License Key below to GSSS for Computer's Registration dialog:

'%%+#ZD_V1YPX1A^^\$RS(!+PS(&&+#IZ

Or Option (3): Alternatively, you can also copy the email attachment 'LicenseKey.txt' file to C:\Gan's Stock Scoring System\ folder, overwriting the existing copy there.

GAN KOK ANN (颜国安)
Email: gankokann@gmail.com
Tel: +6019 - 612 2623

The Official GSSS WebSite:
<https://gankokann.wixsite.com/gsss>

The GSSS Email Client dialog box shows the email provider set to Microsoft Outlook. The recipient is gankokann@gmail.com and the subject is GSSS for Computer Subscription: Please Send Me My Subscription Code. The message body contains a greeting, a remittance notice, and personal details: Full Name, Identity Card No., Telephone Number, and MAC Address (00:05:5D:2E:23:4C). There are 'Send Email' and 'Close' buttons at the bottom.

Routine Tasks Every Subscriber Must Execute On 5th Of Each Month

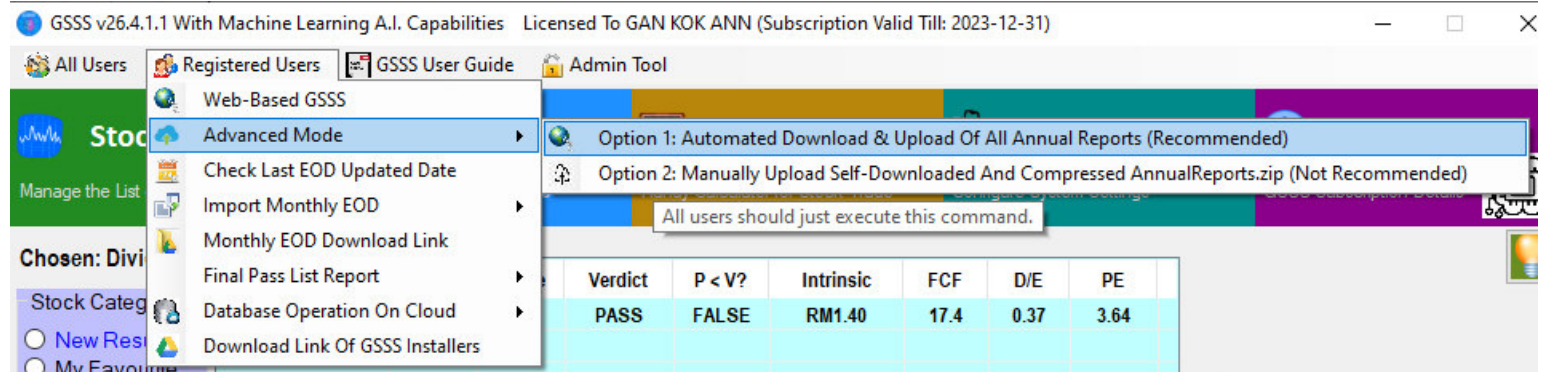

IMPORTANT!

Both the tasks listed below must be performed on 5th of each month:

- Download the latest annual reports (refer to page 57)**

Monthly Download Of The Latest Annual Reports

Page 21 and 22 describe manual download of annual reports. Luckily GSSS also supports automated download:

- 1) Advanced Mode Option 1 – **highly recommended**. The downside is the download takes about 1 hour to complete.
- 2) Download Annual Reports From Cloud (Once A Month) – although can complete the task rather fast, the reports may be outdated since they originate from other users who performed 'Advanced Mode Option 1' previously.

Advanced Feature: Automated Download & Upload Of All Annual Reports

The screenshot shows the GSSS Admin Tool interface. The 'Advanced Mode' menu is open, displaying two options: 'Option 1: Automated Download & Upload Of All Annual Reports (Recommended)' and 'Option 2: Manually Upload Self-Downloaded And Compressed AnnualReports.zip (Not Recommended)'. A tooltip indicates that all users should execute this command. Below the menu, a table with columns 'Verdict', 'P < V?', 'Net Cash?', 'FCF', 'D/E', and 'PE' is visible. To the right, a Notepad window titled 'exclusion.lst - Notepad' shows a list of stock symbols: OMHO, BGROa, MDCH, VPDJ, and STEH.

- I must convey a big thank you to several GSSS subscribers who have been very kind to contribute their expertise in enhancing the overall efficiency of GSSS, which ultimately led to the birth of a Python tool “**bursa_stocklist.exe**” that automates the below tasks:
 - 1) Creation of WatchList1.ini from scratch.
 - 2) Creation of BursaMktPlc_Stock_List.xlsx which contains all stocks and their annual report download links.
 - 3) Automatic download of all annual reports from Bursa Market Place website.
- Once the above mentioned tasks are completed, GSSS will upload the associated files to Cloud.
- **Note: “bursa_stocklist.exe” should reside in C:\Gan’s Stock Scoring System directory.**
- If you wish to exclude certain stocks from being downloaded, please add their stock symbols to exclusion.lst which is located in C:\Gan’s Stock Scoring System directory.

Background Information On Web-Based GSSS

- The use of Internet is prevalent in the present day. For the sake of promoting GSSS to a wider audience, I formulated a plan to develop a web version of GSSS which supports both English as well as Chinese language. After months of hard work, my effort finally paid off!
- In term of feature set, web-based GSSS resides in between the full-blown GSSS for Computer and the limited GSSS for Mobile. Its unique strength lies in the fact that no additional software installation is required at all. All it takes is just a web browser to access the GSSS Web Edition.
- The portal of web-based GSSS is <http://gsss.somee.com>

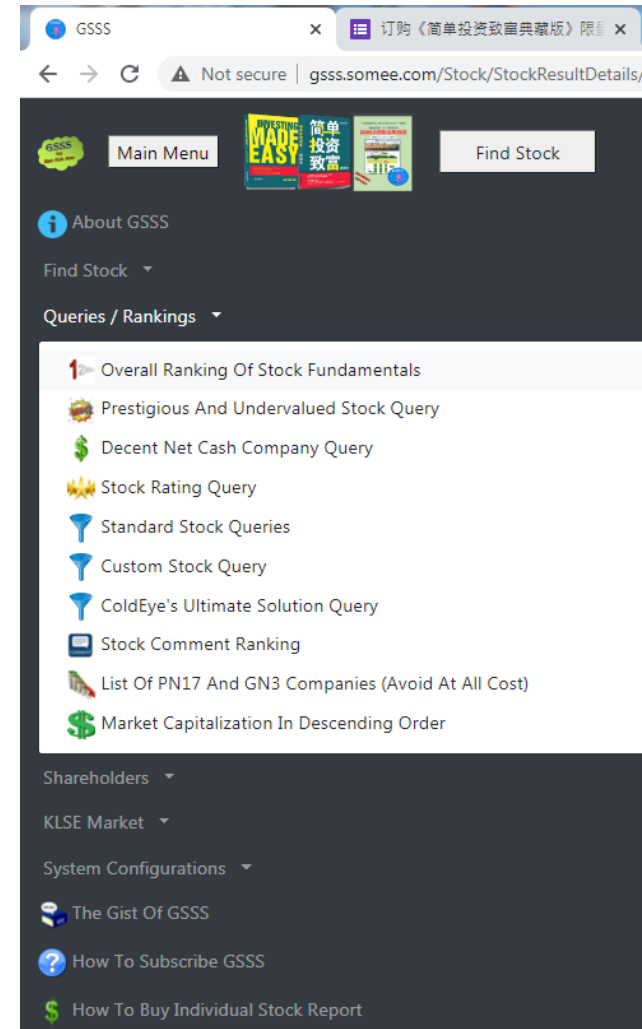

Note: Owing to the restrictions imposed by the web hosting site somee, the GSSS Web Edition site can only be accessed using the “http” and NOT “https” protocol.

Web-Based GSSS In Action

- To access GSSS, from any computer or mobile device, launch any web browser to surf <http://gsss.somee.com>.
- Once the Main GSSS Page appears, user can select any of the menu items presented in the menu:
- The bottom corner indicates if GSSS is busy with background data download and analysis: “Busy” means it is currently tied up with such operations; “Idle” means it is not doing anything at the moment.

System Settings

- User is free to amend the threshold values of various settings so that the indicators of a stock will be highlighted in the corresponding colour, either red (bad fundamental) or green (good fundamental). This is very handy because user will be able to tell if the stock's fundamental is good at a glance. In general, **stocks with solid fundamental exhibit more green colours than red. The opposite also applies here.**
- Stock Alert Email Notification is a very useful feature. **Once activated, user receives two email messages from GSSS daily, which list down any stocks fulfilling the user specified conditions.**

Custom Query Result

Blue background means EPS growth in either the previous 2 quarters or 2 years.

The ☆ symbol precedes item number indicates either ROE > PE or ROE/PB > 10.

Red background means either +ve FCF count ratio < 0.2 or dishonest management.

Dark green background on Margin Of Safety (MOS) represents undervalued and possesses at least 25% discount on intrinsic value.

Call Warrant Computation Result for 'MAYBANK-C77'

Remaining Lifespan (Year)	0.08
Call Warrant Gearing (Multiple)	27.87
Mother Price (RM)	8.36
Call Warrant Price (RM)	0.03
Exercise Price (RM)	8.50
Exercise Ratio	12.00
Call Warrant Quantity (Unit)	1,000
Call Warrant Premium (RM)	0.00
Call Warrant Premium (%)	5.26
Cash Settlement (RM)	-11.67

Subtracts

Investment Cost (RM)	25.00
----------------------	-------

Equals To

Investment Return (RM)	-36.67
Investment Return (%)	-146.67
Potential Mother Price Pushed Down By Operator Based On The Current Warrant Price (RM)	8.80
Potential Mother Price Pushed Down By Operator Based On The Average Warrant Price (RM)	9.07
Lowest Theoretical Mother Price (RM)	8.50

In many cases, the price of mother share will be affected by the price of an expiring call warrant. This is because the warrant issuer will try its best to push down the mother share's price to avoid cash settlement to all call warrant owners. Such share price manipulation presents a golden opportunity for investors to accumulate prestigious stocks at low price.

Premium = (Warrant Price x Exercise Ratio) + Exercise Value - Share Price

An Avenue For Encouraging Subscriber Interactions

- Since I am a firm believer of “Sharing is Knowing”, the web-based GSSS was therefore designed to support mutual interactions among subscribers.
- With such online platform, everyone gets to benefit from the valuable candid opinion of others.
- These are the areas where subscribers share their views:
 1. Qualitative study with SWOT analysis checklist
 2. Favourite stocks
 3. Stock rating and comments
 4. Determine if growth capex boost revenue and eps
 5. Special and notorious shareholders

1. Does the business possess an economic moat that is unrivalled?	Yes	2. To what degree is the customer dependent on the products / services from the business?	Not Sure / No Idea
3. Is the customer base concentrated on just a few major clients?	Not Sure / No Idea	4. Can the business afford to raise prices without losing most of its customers?	No
5. Does the business operate in a good industry (niche market) with less competition?	Yes	6. Does the business generate revenues that are recurring or one-off?	One-Off Income
7. Is the business cyclical?	Not Sure / No Idea	8. Does the business have high Capex requirements?	Not Sure / No Idea
9. Is the management team good at maintaining low operational costs?	Not Sure / No Idea	10. Does the business grow through M&A or organically?	Merger & Acquisition
11. Does the management team own significant stake, i.e. more than 20% shareholding?	Not Sure / No Idea	12. Are the remunerations of the directors much higher than the industry average?	Not Sure / No Idea
13. Does the management team prefer to stay low profile?	Not Sure / No Idea	14. Are the future growth prospects of the business good?	Not Sure / No Idea
15. Has there been a positive change in the business lately?	Not Sure / No Idea	16. Can the business adapt to numerous disruptions brought about by technological advances?	Not Sure / No Idea
17. Is the business model simple to understand?	No	18. Does the company possess a long history of consistent earnings?	Yes
19. Is there any strong operating synergy among the its subsidiaries?	Yes	20. Is the management candid with its shareholders, especially in times of adversity?	Yes
21. Is Management trustworthy? (No past scandal like related party transaction which benefited the director)	Yes		

Update SWOT

Various Extremely Useful Calculators

Call Warrant Computation Result for 'MMCCORP-C25'

Remaining Lifespan (Year)	0.17
Call Warrant Gearing (Multiple)	5.61
Mother Price (RM)	1.65
Call Warrant Price (RM)	0.11
Exercise Price (RM)	1.48
Exercise Ratio	2.80
Call Warrant Quantity (Unit)	1,000
Call Warrant Premium (RM)	0.00
Call Warrant Premium (%)	7.52
Cash Settlement (RM)	60.71

Subtracts

Investment Cost (RM)	105.00
----------------------	--------

Equals To

Investment Return (RM)	-44.29
Investment Return (%)	-42.18
Potential Mother Price Pushed Down By Operator Based On The Current Warrant Price (RM)	1.77
Potential Mother Price Pushed Down By Operator Based On The Average Warrant Price (RM)	2.04
Lowest Theoretical Mother Price (RM)	1.48

In many cases, the price of mother share will be affected by the price of an expiring call warrant. This is because the warrant issuer will try its best to push down the mother share's price to avoid cash settlement to all call warrant owners. Such share price manipulation presents a golden opportunity for investors to accumulate prestigious stocks at low price.

Preference Share Result of 'IGBB-PB'

Remaining Lifespan (Year)	3.50
Gearing (Multiple)	0.83
Common Stock Price (RM)	1.90
Preference Share Price (RM)	2.30
Exercise Ratio	1.00
Expected Annual Return Rate (%)	8.0
Net Present Value (RM)	1.45
Conversion Premium (RM)	-0.85
Conversion Premium (%)	-36.90

Fair Price, Net Present Value < $\frac{V_n}{\text{Exercise Ratio} \times (1 + r)^n}$
(Loan Stock or Preference Share)

V_n : Future price of mother share. We assume it remains the same as the current price.
 r : Expected return after deducting the annual interest received. For instance, if annual interest rate is 4% and we expect to earn 10% return annually, then $r = 0.06$.
 n : The remaining lifespan. Say there are 17 months left, then $n = \frac{17}{12}$.
Exercise Ratio: At least 1 or above.

$V = \text{RM } 1.90$, n = Refer to 'Remaining Lifespan'
Expected Investment Return $r = 8.0 / 100$

Premium = (Warrant Price x Exercise Ratio) + Exercise Value - Share Price

Positive Conversion Premium means worth to invest.

Premium = (Warrant Price x Exercise Ratio) + Exercise Value - Share Price

Stock Details (1 of 13)

- Mind Map Flow Chart assists user in summing up whether a stock is indeed good and safe to invest.
- Only stocks attaining either Level 9 or Level 10 are deemed eligible for investment.
- Instead of focusing on “buy good stock”, we should pay more attention to “buy at good price”. “buy good stock” refers to purchasing a prestigious stock derived from a growth or high dividend stock, which is equivalent to level 8 of the mind map. “buy at good price” means buy below the intrinsic value, that is either level 9 or 10.

No.	Date	Nick Name	Rating	Personal Viewpoint	Action
1	11/30/2019 12:13:24 AM	KA Gan	7	由于塑料原料成本持续低迷, 如果没有意外, 下一个季报的业绩也将会很亮丽。	
2	11/30/2019 12:09:27 AM	KA Gan	7	相信再过不久便会有动静, 可能是派发红股, 或者将食品部门另行挂牌。	

- The “Forum” tab serves to let all subscribers share their opinion and assign individual ratings. The value of rating ranges from 0 to 10, in which 0 is ignored. Higher rating value implies a favourable general consensus towards the stock.
- The “P&C Notes” section is for subscribers to keep their personal notes which are solely for their own purview. The built-in security measures prevent other subscribers from peeping into personal notes not of their own.

Stock Details (10 of 13) : Historical Stock Price Chart

Stock Details (11 of 13) : Market Capitalization

Stock Details (12 of 13) : Qualitative Study With SWOT Analysis

Qualitative Study With SWOT Analysis Checklist

Overall SWOT Score: 66.67%						
No.	SWOT Description	+ve %	-ve %	+ve Score	-ve Score	Neutral Score
1.	Does the business possess an economic moat that is unrivalled?	0.0%	100.0%	0	1	0
2.	To what degree is the customer dependent on the products / services from the business?	0.0%	100.0%	0	1	0
3.	Is the customer base diversified broadly or concentrated on just a few major clients?	100.0%	0.0%	1	0	0
4.	Can the business afford to raise prices without losing most of its customers?	0.0%	100.0%	0	1	0
5.	Does the business operate in a good industry (niche market) with less competition?	0.0%	100.0%	0	1	0
6.	Does the business generate revenues that are recurring or one-off?	100.0%	0.0%	1	0	0
7.	Is the business non cyclical?	100.0%	0.0%	1	0	0
8.	Does the business enjoy low Capex requirements?	0.0%	100.0%	0	1	0
9.	Is the management team good at maintaining low operational costs?	100.0%	0.0%	1	0	0
10.	Does the business grow through M&A or organically?	100.0%	0.0%	1	0	0
11.	Does the management team own significant stake, i.e. more than 20% shareholding?	100.0%	0.0%	1	0	0
12.	Are the remunerations of the directors reasonable when compared with the industry average?	100.0%	0.0%	1	0	0
13.	Does the management team prefer to stay low profile?	100.0%	0.0%	1	0	0
14.	Are the future growth prospects of the business good?	100.0%	0.0%	1	0	0
15.	Has there been a positive change in the business lately?	100.0%	0.0%	1	0	0
16.	Can the business adapt to numerous disruptions brought about by technological advances?	0.0%	0.0%	0	0	0
17.	Is the business model simple to understand?	0.0%	0.0%	0	0	0
18.	Does the company possess a long history of consistent earnings?	0.0%	0.0%	0	0	0
19.	Is there any strong operating synergy among the its subsidiaries?	0.0%	0.0%	0	0	0
20.	Is the management candid with its shareholders, especially in times of adversity?	0.0%	0.0%	0	0	0
21.	Is Management trustworthy? (No past scandal like related party transaction which benefited the director)	0.0%	0.0%	0	0	0

- A profitable investment relies on both the quantitative as well as qualitative analysis.
- GSSS is so powerful in that it gathers feedback from all subscribers who participate in carrying out SWOT analysis.
- Data crunching is then carried out on the feedback to arrive at appropriate conclusion which is considered to be objective.
- Note: User response of “Not Sure / No Idea” is ignored in the calcuylation of the SWOT score.

- Beware of the exercise price of any soon to expire structured call warrant, because the issuer will try very hard to push the mother price below the exercise value in order not to compensate the warrant holder.

Manual Confirmation Of Whether Growth Capex Boosts RPS and EPS (Please Act)

- Apart from CAGR, we can also rely on manual inspection by human eyes to ascertain if growth capex leads to an increase in both the revenue per share (RPS) as well as EPS.
- For the “Capex” tab display of any stock which contains the message “(Please inspect)”, GSSS requires the help from subscribers to open the tab and assess if the growth capex boosts both the RPS and EPS.
- Since this is a very important criterion, please help to update your findings on all stock counters.
- Note: You may wonder why GSSS is unable to automatically make such a conclusion. The reason lies in the fact that it may take some years before the effect of growth capex is finally reflected on both the RPS and EPS.

Information Of Company Warrants And Structured Warrants

- Although I do NOT speculate in warrants, GSSS still provides such useful information, **mainly because the price of the mother share may be intentionally pressed down to go below the exercise price of an expiring call warrant by the warrant issuer.**

How to Subscribe

For any user who wishes to enjoy the full benefits of licensed web-based GSSS, you are required to

- 1) remit RM1,800 or RM900 into my Maybank account (account number is 505055-504492) and provide your particulars in the descriptions of your online transaction. You are required to attach the remittance receipt as evidence in your email to me.
- 2) furnish your particulars as shown below in your email to me:

Your Full Name:
 Identity Card Number:
 Telephone Number:
 Email Address Used For GSSS Login:
 Your Chosen Password For Accessing GSSS:
 Gmail Address Used For Watching GSSS Videos:

My contact information is as follows:

GSSS Developer Name:	Gan Kok Ann
Email Address:	gankokann@gmail.com
Telephone Number:	019 - 612 2623
Bank Name:	Maybank Berhad
Account Number:	505055-504492
Annual Subscription Fee:	RM1,800 (Before 1st-July) RM900 (After 30th-June)

Note: To be fair to new user who wishes to initiate subscription but there are only less than 3 months left in current year, a special consideration is granted provided user wishes to subscribe till the end of the next calendar year (meaning more than a year's subscription. Otherwise, any other request will not be entertained).

For instance, say user wishes to start using GSSS for Computer in early October of 2020, the pro-rated subscription fee until 2021 December 31st = (15/12 * RM1800) = RM2,475 for 15 months usage period

Note: The validity of GSSS subscription is until 31st December of each year.

GSSS For Mobile Phone

(Runs On Android)

Discontinued, No Longer Updated!

<https://bit.ly/2VYIEa1>

Smart Design Behind GSSS For Mobile Phone

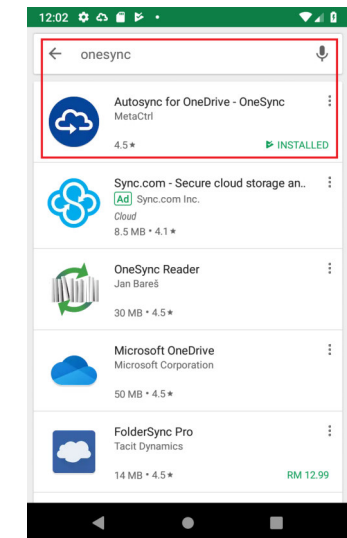

- “Resource Sharing” and “Cloud Computing” are the hot trends in recent years. In order not to lag behind the fads, GSSS has finally evolved, owing to several netizens requesting for a mobile version of GSSS. It extended from the original computer version to support the mobile phone platform.
- After many months of relentless learning process and painstaking hard work, I am happy to announce the accomplishment to this tough challenge! (At the expense of the death of numerous brain cells 😊).

Chronological Order of Installations for Getting GSSS for Mobile to Work Seamlessly

- In order to get GSSS for Mobile to work without any hiccups, user is advised to carry out the following tasks in their right order:
 1. Download and install GSSS_Mobile.apk from the link provided in the official GSSS website (follow the steps in slide 43) <https://gankokann.wixsite.com/gsss>.
 2. **After install GSSS for Mobile, run it ONCE just to view the main screen and then quit the app.** This will create the /storage/emulated/Android/data/com.gan.GSSS_Mobile directory required by OneSync.
 3. Install OneSync from Google Play. Follow the steps outlined in slides 44-46 to configure the synchronization of database files used by GSSS_Mobile.
 4. Run GSSS for Mobile.

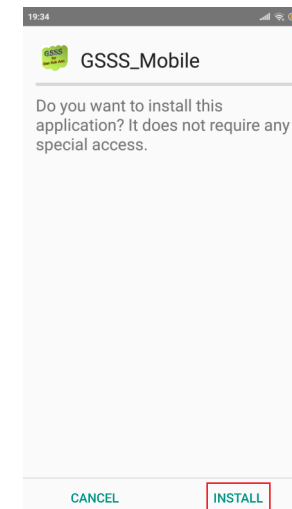

Note: The above steps MUST be followed whenever GSSS_Mobile is reinstalled.

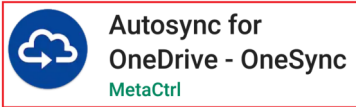

Installation of GSSS for Mobile App (GSSS_Mobile.apk)

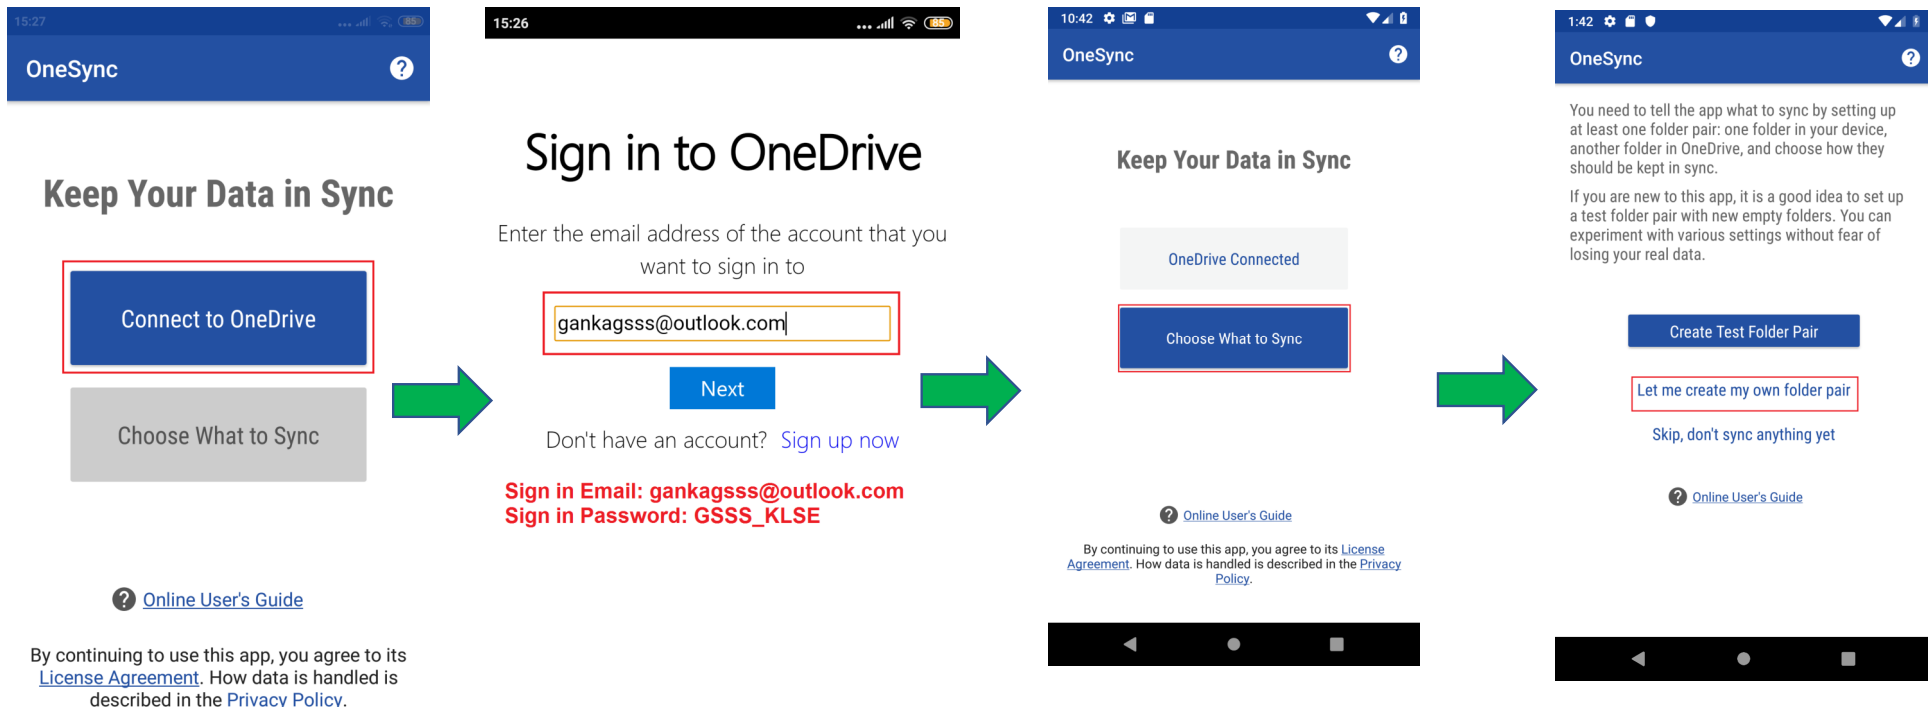

- The installer of GSSS for Mobile (GSSS_Mobile.apk) is downloadable directly from <https://bit.ly/2VYIEa1> or via the official GSSS website <https://gankokann.wixsite.com/gsss>.
- By default, Android prevents users from downloading and installing applications from locations other than Google Play. **Therefore, user must enable the "Unknown sources" setting on his mobile device before attempting to install GSSS for Mobile. The setting for this may be found under Settings -> Security, as shown on the right.**
- **Once you begin installing GSSS for Mobile on your Android device, you will come across the "Blocked by Play Protect" warning message. Just click "Install Anyway" to proceed with the installation.**

Installation Of OneSync That Works Alongside GSSS For Mobile (1 of 3)

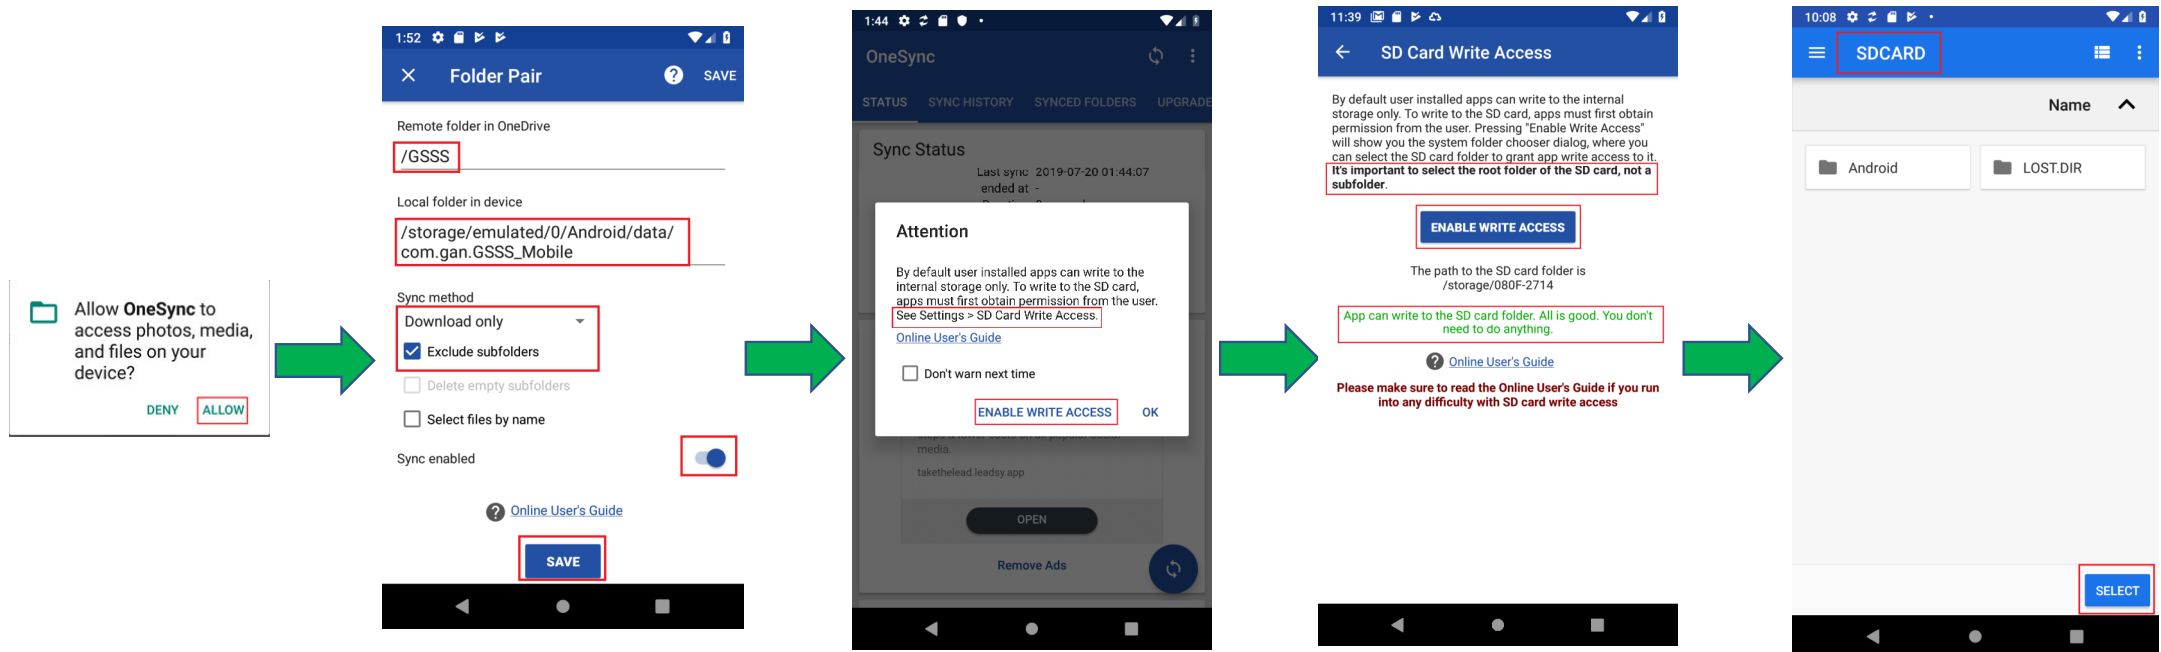

Choose “Let me create my own folder pair”.

Installation Of OneSync That Works Alongside GSSS For Mobile (2 of 3)

Installation Of OneSync That Works Alongside GSSS For Mobile (3 of 3)

GSSS For Mobile In Action

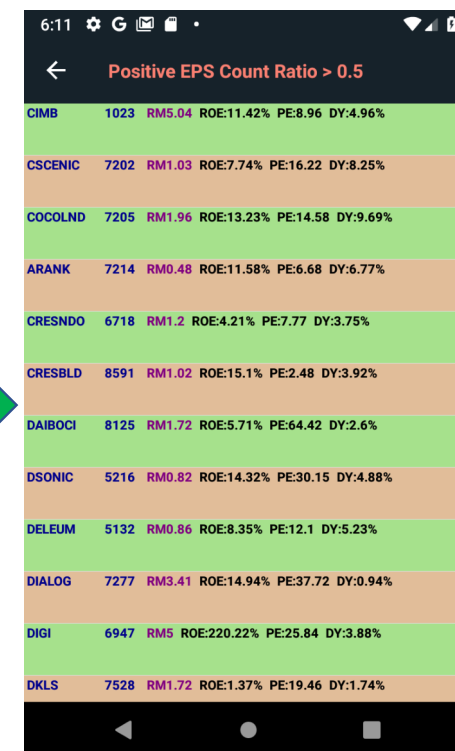

- Internet access is a pre-requisite for running GSSS for Mobile if user wishes to download the latest processed data from the Cloud. To do so, user MUST first launch OneSync to download the latest database containing all the analysis results from the Cloud.
- Once the latest database is downloaded, the Internet access is no longer required. User can now execute GSSS for Mobile offline to view the processed data locally.
- It is important to note that GSSS displays a splash screen which lasts about 25 seconds during loading as it is busy populating the content of the database into memory.
- Once the Main GSSS Page appears, user can select any of the 9 menu items presented in the menu:
 - Pick A Standard Query to Run
 - Find Stock by Code/Symbol
 - Settings of Fundamental Indicators
 - Limitations of Trial Usage
 - How to Subscribe GSSS for Mobile
 - Send GSSS for Mobile Subscription Email
 - More Resources
 - Main GSSS Page
 - About GSSS for Mobile

Executing Standard As Well As Custom Queries (1 of 2)

- There are 2 types of queries provided by GSSS for Mobile, namely:
 - Standard Query – A total of 49 standard queries are made available.
 - Find Stocks by Stock Code/Symbol – User enters either a partial stock code or stock symbol. GSSS for Mobile will return the results of stocks matching the search criteria.

Executing Standard As Well As Custom Queries (2 of 2)

- The “Settings of Fundamental Indicators” page is provided for user to configure the thresholds which are used for rendering the indicators with appropriate colours.
- As a general rule of thumb, green colour implies good while red colour means bad.
- On the “Stock Details” page, if we observe that a stock is presented with many red spots, then we should avoid such stock. On the contrary, a good stock has many green spots.

Limitations of Evaluation Copy

Steps Involved in Activating the Annual GSSS For Mobile Phone Subscription

- If user is satisfied with the features provided by GSSS for Mobile and would like to go for annual subscription, user is advised to first read through the information stated in “How to Subscribe GSSS for Mobile”. Once done, he needs to take the following actions:
 - Remit the correct amount of money into Mr. Gan Kok Ann’s Maybank account. State your name in the online transaction or keep the receipt as evidence.
 - Send an email to gankokann@gmail.com. You can either do it yourself or within GSSS for Mobile app by filling in your particulars.

Note: GSSS for Mobile requires the unique MAC Address of your mobile device as part of the subscription process.

Note: Apart from subscribing to GSSS, user may also choose to purchase individual stock analysis reports.

7:04

How to Subscribe GSSS for Mobile

GSSS for Mobile is a subscription based software application which charges an annual renewal fee of RM1,000 (if you subscribe on or before June 30th) or RM500 (if you subscribe after June 30th) in order to access the latest analysed data of all stocks.

Note: The validity of GSSS for Mobile subscription is until 31st December of each year.

For any user who wishes to subscribe GSSS for Mobile, you are required to

- 1) Remit RM1,000 or RM500 into my MayBank account (account number is 505055-504492) and provide your particulars in the descriptions of your online transaction.
- 2) Select 'Send Email to Subscribe GSSS for Mobile' within this App and furnish your particulars in the email message.

My contact information is as follows:

Developer Name: Gan Kok Ann
Developer Email Address: gankokann@gmail.com

Common Topic

Important Facts That New Or Returning Subscribers Must Take Note Of

- Due to popular demand, GSSS now offers the following renewal packages to all existing subscribers:
 - Whole year renewal plan, from Jan 1st all the way to Dec 31st, or from July 1st to the following year's June 30th.
 - First half renewal plan, from Jan 1st to June 30th.
 - Second half renewal plan, from July 1st to Dec 31st.

Note: The above renewal plans are out of reach for brand new subscribers.

- All existing subscribers can choose to suspend the renewal upon mature date. However, as a gesture of fairness to loyal supporters, GSSS will treat future returning subscribers as brand new users, as if they are the first time subscribers (must subscribe to the 1 year plan).
- The following restrictions apply on those who are deemed as brand new users:
 - Unable to access the historical messages posted in the Telegram group prior to joining it.
 - Unable to read the historical stock comments and ratings posted prior to the date of first subscribing GSSS. This implies potential deviation from the actual fact.

Take Advantage On The Reward Point System To Enjoy Up To 10% Discount

- As a gesture to reward loyal subscribers who actively participates in providing feedback, GSSS puts in place a reward point system that offers up to 10% discount on next year's annual subscription. That means the annual fee reduces from RM1980 to RM1782 (for computer subscriber), and from RM1800 down to RM1620 (for web subscriber). **Note: Those who choose the half year subscription package cannot enjoy such offer.**
- Subscriber is required to analyze at least 60 stocks (GSSS system will determine the total points earned, ignoring same stocks) that achieve at least level 5 of mind map (based on the factory settings), covering all 4 analysis types in order to enjoy the 10% rebate. Below is the list of 4 analysis types:
 - Add new shareholder name or update industry/sector
 - SWOT analysis
 - Impact of capex on both the revenue and eps
 - Stock rating (must enter rating score) and comment
- If the number of stocks analyzed is less than 60 but more than 30, eligible subscriber enjoys 5% off the annual subscription fees.
- No subscription discount is granted if none of the conditions is met.
- Since this is a win-win offer, I sincerely hope all subscribers take the initiative to contribute feedback to enjoy the special discount.

- This essential tool is restricted to subscribers, and a valid email address has to be entered to activate it.
- If your local storage is outdated, please click the Database Download button to retrieve the latest data,
- GSSS Database Tool provides a means for altering the following information:
 - Prominent shareholders – user can add or remove existing shareholder. If an annual report is provided, this tool is smart to extract all shareholder names from the annual report.
 - Industry and sector a stock belongs to.
- Once complete, click the Upload To Cloud button to share the new information with other subscribers.⁹⁵

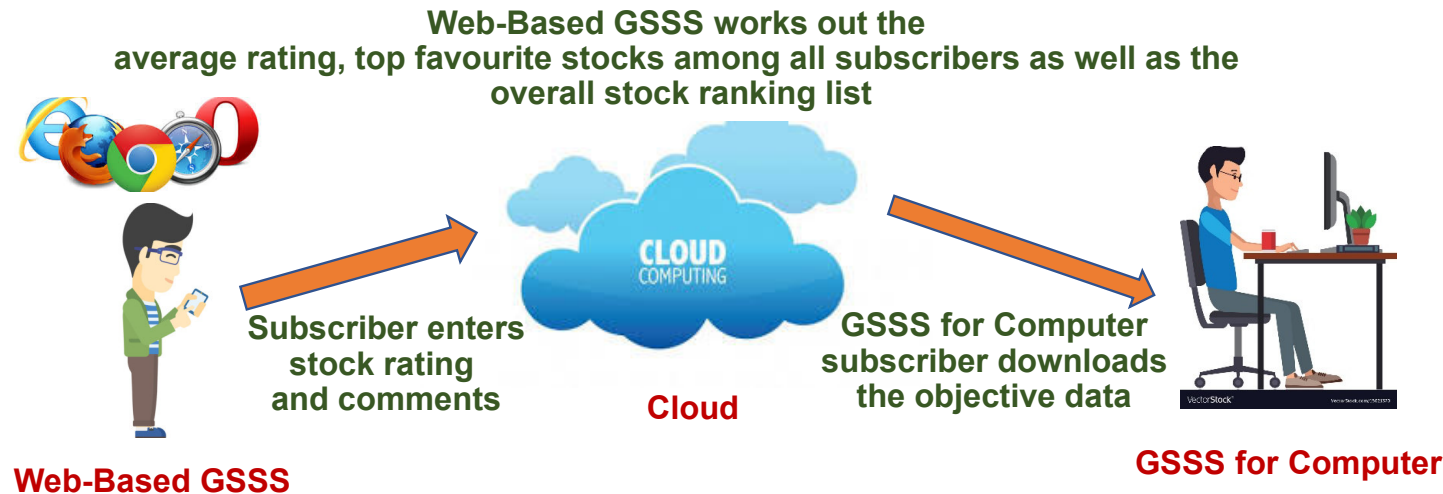

GSSS Database Tool (Part 2 of 2)

Note: GSSS Database Tool is accessible to all GSSS subscribers, covering both the web and computer platform users. That means even for someone who subscribes to web-based GSSS, he is encouraged to utilize the GSSS Database Tool.

Note: Apart from the standalone GSSS Database Tool which runs on Microsoft Windows, subscriber can also perform the same tasks within the web-based GSSS, without the need to install this tool at all.

How GSSS Generates An Objective Stock Rating And Stock Ranking List?

- The core strength of GSSS lies in its capability in offering an effective avenue for subscribers to participate in stock rating, in which the user input data is stored in the Cloud.
- GSSS also monitors the top favourite stocks picked by all subscribers.
- In addition, the web-based GSSS automatically computes the overall stock ranking on a daily basis, leveraging from the 37 important indicators.
- Apart from feeding to the web user, the same data is also automatically downloaded to his computer (provided he subscribes to GSSS for Computer), to be displayed in the Final Pass List report.

How GSSS Helps Us “Buy Undervalued Top Quality Stock”

- I have been abiding by the "Buy Undervalued Top Quality Stock" investing approach. Even though there is no guarantee of 100% success rate, somehow past financial results do extrapolate into a reliable future forecast.
- Between both "Undervalued" and "Top Quality" conditions, I always begin my exploration with "Top Quality". First and foremost, I make sure that Company Quality Score > 60%, and all the four historical PE, P/NTA, PSR as well as EV/EBITDA charts are rendered with light green background. Next, the values of both +ve FCF Ratio and +ve EPS Ratio must be high (the perfect ratio is 1.0).
- For the computer version, the sum of green colour in the Final Pass List report must outnumber the sum of red colour. The same trick also applies to the mobile version and web-based GSSS. Most certainly, I do not neglect Dividend Payment Years, Overall Trend Score as well as Piotroski F-Score. The higher the values, the better they are.
- Once a stock fulfills the “Top Quality” criterion, my next step is to ensure that it is “Undervalued”. I will compare its current price with the calculated intrinsic value, preferably having a comfortable margin of safety. Apart from that, I will inspect the Linear Regression chart on its historical price (plotted with A. I. computation), to further affirm its cheapness.
- I will then compare its Market Capitalisation with Shareholders’ Equity, check on its Takeover Price and Graham’s Maximum Price. Last but not least, I will compare the figures of its EV/EBITDA, PE, ROE, DY, D/E, etc. with other competitors from the same industry.
- Only after both “Undervalued” and “Top Quality” criteria have been fully matched, I will then consider owning this stock. The advent of Mind Map Flow Chart greatly simplifies such quest.
- **Note: Do NOT simply rush in to buy a stock just because it fulfills both the “Undervalued” and “Top Quality” criteria. Even after passing the quantitative analysis, we need to ensure that it passes the qualitative analysis before deciding to buy.**

Crucial Indicators Within GSSS That Are Used By Mr. Gan Kok Ann In Stock Picking

- **Note: These rules merely serve as references, they may not suit everyone.**

- 1) First and foremost, I would ensure that the stock must reach at least level 8 in the Mind Map Flow Chart, failing which it will be rejected immediately.
- 2) Next, Company Quality Score > 63% and it must pass the peer comparison matrix. Moreover, both the +ve EPS Count Ratio and +ve FCF Count Ratio must fulfill my stipulated requirements.
- 3) If all the above criteria are met, I will then inspect the following trend charts by naked eyes:
 - Retained Earnings trend chart (whether exhibits significant downtrend)
 - Net Income trend chart (whether exhibits significant downtrend)
 - Debt / Equity trend chart (whether on uptrend mode, and stays high all the time)
 - OCF and FCF trends
 - Do RPS and EPS increase over time?
 - Consistent and uninterrupted decent Dividend payout history
 - Does Growth Capex boost both RPS and EPS?
 - Cash On Hand and Net Cash trends
 - Does Total Debt increase in the long run?
- 4) Are the CAGRs of RPS and EPS acceptable? Is the stock's position within the top 15% ranking?
- 5) In the prominent shareholder list, does it include the name of any special shareholder? If any notorious shareholder appears in the list, I will normally disqualify the stock without any hesitation.
- 6) If the average rating is below 4.5, the stock will be ditched.

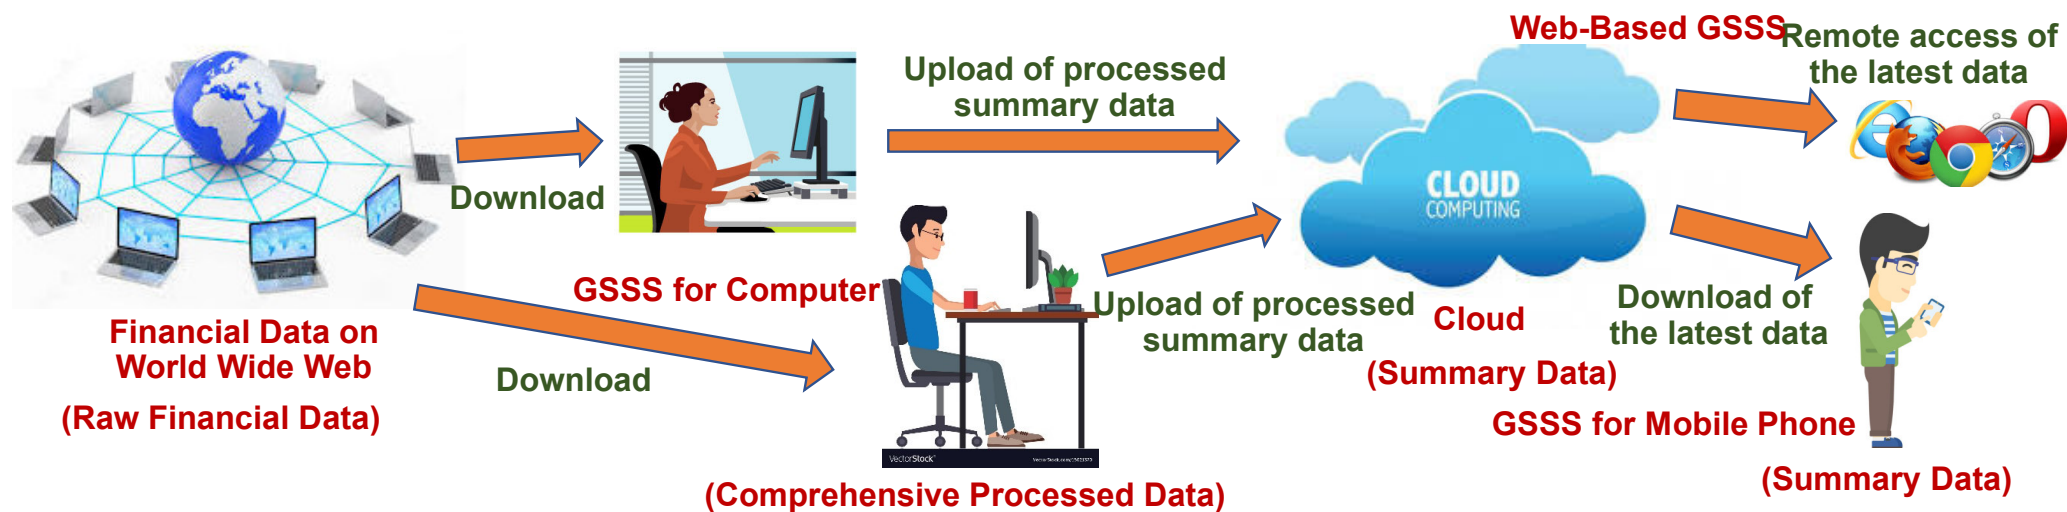

Feature Comparisons Among The Three Variants Of GSSS

Functionality	Computer	Web	Phone
Subscriber can access various historical trend charts	✓	✓	✗
Subscriber selects “Shareholders” to pinpoint stocks owned by prominent shareholders	✓	✓	✗
Subscriber uses “Standard Queries” to access more than 50 rank listings of stock indicators	✓	✓	✓
Subscriber uses “Custom Queries” to retrieve analysis results for individual stock	✓	✓	✓
The ability to update the historical KLCI EOD data to create bullish-bearish trend chart	✓	✓	✗
Access to the latest processed GSSS analysis data	✓	✓	✓
Provision of user interaction in the form of stock rating and discussion board to share opinion	✗	✓	✗
Latest analyzed financial data and indicators are stored on user’s device and belong to the user (Unlike Computer which accesses the instantaneous data, the data used by Web and Phone are uploaded once per month)	✓	✗	✗
Display of the comprehensive analysis data in its entirety, not just limited to the summary	✓	✓	✗
The use of A. I. in plotting Linear Regression chart to ascertain if a stock is undervalued or overvalued	✓	✗	✗

Note: Apart from subscribing to GSSS, user may also choose to purchase individual stock analysis reports.

16:46 ✓

You may not be aware, but my programming skills improve a great deal after kicking off GSSS 16:47 ✓

LL of course i am fully aware of that !! 16:47

I now know web programming, Android programming, cloud computing, Google drive file transfer, One Drive file transfer, email handling etc. which I did not know about before I retired 16:49 ✓

LL amazing 16:49

I learned everything all by myself, of course it was a very painstaking challenge 16:50 ✓

I would never create GSSS if I am still working full time 16:51 ✓

Let alone wrote 2 books 16:51 ✓

How To Purchase Individual Stock Analysis Report

How To Buy Stock Analysis Report

For any user who wishes to purchase a detailed stock analysis report, you are required to

1) remit RM200 per stock report into my MayBank account (account number is 505055-504492) and provide your particulars in the descriptions of your online transaction. You are required to attach the remittance receipt as evidence in your email to me.

2) furnish the particulars as shown below in your email to me:

Stock Code (Each Stock Costs RM200):

Email Address:

My contact information is as follows:

GSSS Developer Name:	Gan Kok Ann
Email Address:	gankokann@gmail.com
Telephone Number:	019 - 612 2623
Bank Name:	Maybank Berhad
Account Number:	505055-504492
Report Cost:	RM200 Per Stock

Note: The cost of RM200 per report does NOT grant the buyer any privilege to join the GSSS stock forum hosted on Telegram. If buyer wishes to access future report of the same stock, he will have to purchase a new report again.

Frequently Asked Questions 1 (FAQ)

- How much does the annual subscription of GSSS cost?

Subscription Package	Computer Package (Free Web and Mobile Phone Packages)	Web Package
Yearly Package	RM1,980	RM1,800
Half Yearly Package	RM1080	RM950

Note: To be fair to new user who wishes to initiate subscription but there are only less than 4 months left in current year, a special consideration is granted provided the user wishes to subscribe till the end of the next calendar year (meaning more than a year's subscription. Otherwise, any other request will not be entertained).

For instance, say User wishes to start using GSSS for Computer in early October of 2020, the pro-rated subscription fee until 2021 December 31st = $(15/12 * RM1980) = RM2,475$ for 15 months usage period.

- If I do not wish to subscribe GSSS, can I have the option to purchase individual stock analysis report?
 - **Due to popular demand, you can now purchase detailed stock analysis report which costs RM200 per stock.**
- Being a subscriber of GSSS for 2019, what is the implication if I stop subscribing GSSS in 2020?
 - **In this example, you can still run GSSS although it will not download the financial data for 2020 and beyond. That means its analysis results will be outdated.**
- How can we tell if a stock is deemed top-rated?
 - **First and foremost, the stock must score a passing mark in the first phase (Data Analysis). Nevertheless, passing the first level alone is inadequate as some companies can beautify financial data by means of creative accounting. As such, we MUST review the chart trends in the Final Pass List report. Five-star stocks usually exhibit long-term rising revenue and net profit trends. At the same time, their FCF, DY, ROE and ROA are all good, while keeping D/E well within the acceptable threshold.**
- After successfully picking a five-start stock, how do we know when to buy it?
 - **Even if we have found a top-quality stock, it does not necessarily mean we can make a profit, especially when our purchase price is much higher than its intrinsic value. Therefore, to mitigate the risk, we must ensure that the stock we buy comes with a comfortable Margin Of Safety.**

Frequently Asked Questions 2 (FAQ)

- Since the web-based GSSS is so convenient and cheaper, is there a need for me to subscribe to GSSS for Computer?
 - **Undoubtedly, GSSS Web Edition provides subscribers with a fast and convenient channel to intercept financial data and indicators of individual stocks at anytime, anywhere. Nonetheless, the online version is not comprehensive enough (see the Feature Comparison Table on page 77 for details), and its data is somewhat outdated (I upload the latest data about twice a month), unlike the Computer version which retrieves the get first-hand information via Data Analysis.**
- Being a GSSS for Computer subscriber, how often should I execute the Data Analysis and Final Pass List commands?
 - In fact, in order to ensure that the database stored in the cloud is up-to-date, I hope that all subscribers of GSSS for Computer will be able to run the computer version often (perhaps two or three times a month) so that the latest database can be automatically uploaded to the Cloud after the Final Pass List report is created.
 - Since executing Data Analysis on 'Watchlist1' takes quite a long time, there is a better way to save up precious time. User can opt to run Data Analysis on 'New Results', about twice a week on a regular basis. By doing so, the database always stays up to date, and there is no longer a need to run Data Analysis on 'WatchList1' anymore. Periodically, user can select 'WatchList1' in Offline mode to run Final Pass List to generate a complete report on all stocks.
 - Through the cooperation of all of you, users of GSSS Web and Mobile Editions will benefit greatly as they can get first-hand updated financial data.
- Am I allowed to switch my annual subscription among the three mobile, web and computer variants?
 - Of course you are permitted to switch your annual subscription from one platform to the other by paying the difference in the amount involved. For instance, say you are currently subscribed to the online web version of GSSS. When it comes to a new calendar year, you would like to switch to the computer platform, all you need to do is just remit RM1,980 to activate your computer subscription.
- What should I do if Data Analysis report is produced but not the Final Pass List report?
 - **When this problem occurs, it means your local database is corrupted. Please remove all files that end with the .db extension residing in C:\Gan's Stock Scoring System and then rerun your Data Analysis again.**
- Will the annual subscription fee of GSSS increase in future?
 - **Absolutely NOT, the existing subscription fee will stay unchanged forever. My main source of income comes from stock investment, not from selling GSSS software.**

Frequently Asked Questions 3 (FAQ)

- Why can't I sign up for the half year plan for the first time subscription?
 - Since it takes a lot of effort to create a new user account, I will rather NOT entertain anyone who wants to go for half year subscription. However, regular GSSS subscribers can choose to renew subscription on a half year basis upon tenure maturity, albeit at the expense of NOT qualifying for the reward point incentives.
- What will I lose if I stop renewing GSSS for a while, and then reinitiating my subscription months or years later?
 - First of all, Mr. Gan Kok Ann updates the active subscriber list twice a year, on Jan 1st and July 1st respectively. Anyone who stops renewing the subscription will be barred from accessing these private Telegram and Facebook groups with immediate effect.
 - Say a user who once stopped the subscription decides to rejoin the GSSS family. He stands to lose BIG time due to the following reasons:
 - He loses access to all the historical messages during his absence from the Telegram group.
 - He loses access to all the historical stock comments since he is allowed to only read new comments after his date of rejoin.
 - He has to sign up for the 1 year subscription once again, since he is treated as a brand new subscriber.
- Since there are so many indicators, how do I know which ones are more important?
 - As a rule of thumb, any indicator that displays the zoom lens  alongside is considered to be very important.
- Why must my subscription expire on either 30th June or 31st December?
 - To eliminate unnecessary hassle, GSSS only supports two expiry dates, namely 30th June and 31st December. For first time subscriber who starts on say 1th September, his annual subscription will expire on 30th June the following year and he has to pay for the whole year. Nonetheless, to be fair to him, he can choose to extend his subscription all the way to 31st December the following year, by paying according to the equation (annual fee x 16 / 12) since there are 16 months in total.

The End

Thank You
